Fort McDowell Yavapai Nation Demographic Analysis

Introduction

This analysis of the Fort McDowell Yavapai Nation was undertaken by the Arizona Rural Policy Institute (ARPI) in the W.A. Franke College of Business, at Northern Arizona University for the planning department of Fort McDowell Yavapai Nation. The ARPI has produced the Demographic Profile for Fort McDowell Yavapai Nation, with the latest information available from the 2010 Census and the 2010 American Community Survey (5 year estimates). Once the American Community Survey (ACS) data estimates for the 5 year 2006-2010 series became available the ARPI completed the analysis, which follows in the document. This document is provided to Arizona tribes as a product of the EDA Technical Assistance grant provided by the EDA to the ARPI at Northern Arizona University.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties. Therefore, this report incorporates two major data sources. First, the official 2010 Census, primarily from the SF1 data report to produce data on the population, age, race and ethnicity relative to Fort McDowell Yavapai Nation. The second data source is the American Community Survey, 5-year estimate data for the period 2006 to 2010 and is annotated in the document as ACS 2010 (5 year estimates). The 2010 ACS 5-year estimates are based on data collected between January 2006 and December 2010. The data were used to analyze household income, poverty rates, employment, language use and household characteristics for Fort McDowell Yavapai Nation. Only the 5-year estimates are used as the data was provided for small geographic areas, representing the average characteristics over the 5-year period.

The analysis of demographics for Fort McDowell Yavapai Nation first examines the 2010 Census and then the American Community Survey where data is available. Demographic characteristics are outlined by three separate levels, the State of Arizona, Maricopa County and the Fort McDowell Yavapai Nation. Comparisons between the State of Arizona and Maricopa County serve to provide further levels of comparison when examining demographic characteristics of the tribe versus the County and the State.

The attached Excel spreadsheet contains the official tabular data for the seven districts from the ACS along with the margins of error used to calculate the estimates for the ACS.

Population

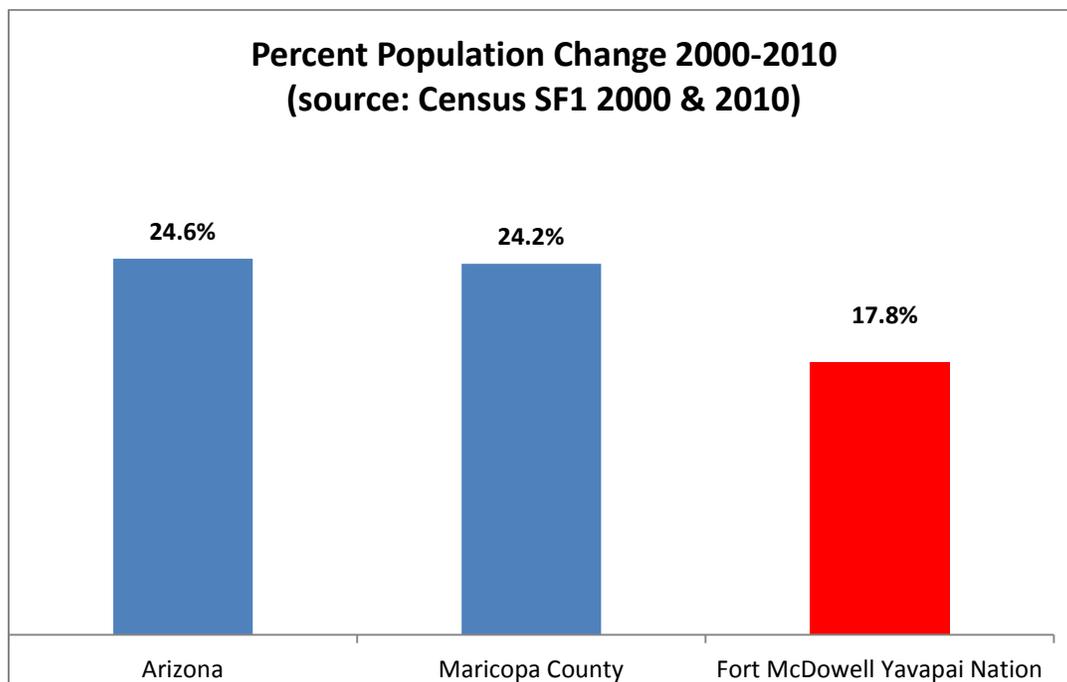

The population of the Fort McDowell Yavapai Nation increased dramatically (17.8%) in 2010 when compared to 2000. This increase in tribal members, however, may not truly reflect the actual change in the tribe between the census periods. Both the state (24.6%) and the county (24.2%) grew between the last census in 2000 and 2010. In fact the population of Maricopa County doubled between the 2000 and 2010 Census. The rate of population growth of Maricopa County is the highest in the State and one of the highest in the Nation.

Table 1. Total Population & Trends

Total Population and Trends	Arizona	Maricopa County	Fort McDowell Yavapai Nation
Total Population 2000	5,130,632	3,072,149	824
Total Population 2010	6,392,017	3,817,117	971
Change in Population 2000-2010	24.6%	24.2%	17.8%

Source: Census 2000, 2010 SF1

Figure 1. Percent Population Change 2000 to 2010 Arizona, Maricopa County & the Fort McDowell Yavapai Nation

Gender

There are slightly more females (50.6%) than males (49.4%) within the Fort McDowell Yavapai Nation. The gender ratios in the Fort McDowell Yavapai Nation are lower for males in both the State (49.7%) and the County (49.5%). Females (50.6%) comprise a larger proportion of the population among the Fort McDowell Yavapai Nation tribal members than either the State (50.3%) or the County (50.5%).

Table 2. Gender Ratios

	Arizona	Maricopa County	Fort McDowell Yavapai Nation
Males	3,175,823	1,888,465	480
Females	3,216,194	1,928,652	491

Source: Census 2000, 2010 SF1

Age

The Fort McDowell Yavapai Nation is dominated by those under 18 years of age. The under-18 year population accounts for 36.8 percent of all tribal members, representing a similar proportion for that age group compared to the State (25.5%) and Maricopa County (26.4%). The fact that one-third of the tribe is younger than 18 years of age carries with it important policy implications. The large portion of younger tribal members influences the provision of health and educational services as well as poverty and workforce issues as well.

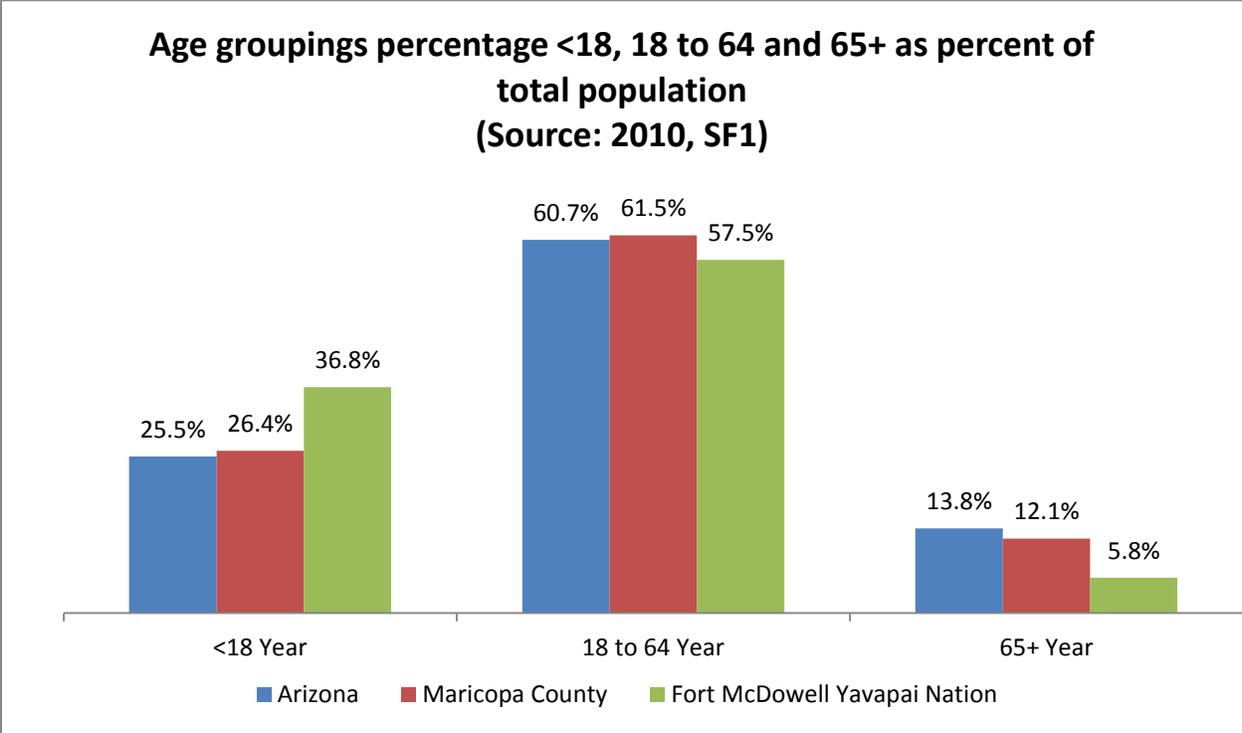

On the other hand, the tribe has more members who are 65 years or older as a proportion of the total population. This age group, those who have retired and are out of the workforce account for only 5.8 percent of tribal members when compared to 13.8 percent for the state and 12.1 percent for the county. The Fort McDowell Yavapai Nation have a similar age profile vis-à-vis other Arizona tribes, with a greater percentage of tribal members under age eighteen. Finally, those age 18 to 64 years account for 57.5 percent of the tribal members, which compares favorably to the State (60.7%) and lower than the County (61.5%). The large number of tribal young persons will have an effect on the development of the tribal workforce in the future. See Table 3, and Figure 1.

Table 3. Age Groups by 5 Year Cohorts

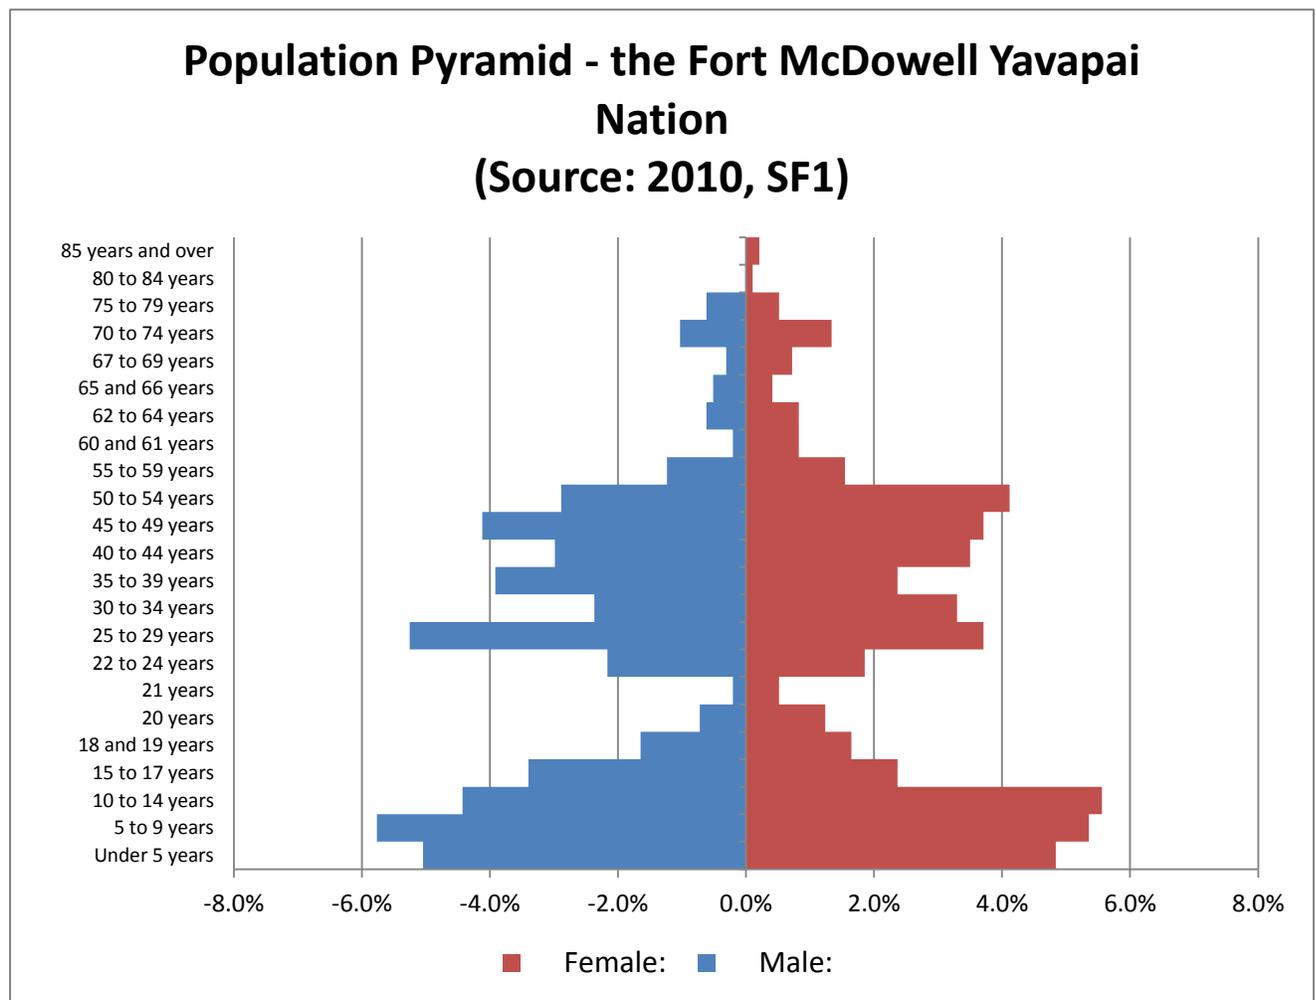

Figure 2. Age Cohorts for Arizona, Maricopa County & the Fort McDowell Yavapai Nation 2010

A population pyramid, also called an age structure diagram, is a graphical illustration that shows the distribution of various age groups in a population (typically that of a country or region of the world), which forms the shape of a pyramid when the population is growing.

The population pyramid below (Figure 3) illustrates the difference between males and females for the 5 year age cohorts. The under-18 age cohorts are symmetrical indicating that there are an even number of males and females. The population between 20 and 21 years of age represent a small part of the distribution. At the top of the age pyramid there are more females than males. This is also a demographic reality as women tend to live longer than men. The age pyramid provides an illustrated snapshot of the age structure of the tribal members at the time of the 2010 census.

Figure 3. Population Pyramid - the Fort McDowell Yavapai Nation 2010

Population Under 18 Years

Children those under 18 years of age account for 36.8 percent of all tribal members. There are 480 males and 491 female tribal members, of those 37.7 percent of all males are under age 18 and 35.8 percent of all females are under age 18. There are more males under age 5 years (34.8%) than females (30.7%), while the sex ratios are similar for those between 5 and 10 and 11 to 17 years of age. See Table 4.

Table 4. Single year age by gender for those under 18 years of age

Total Population	Male:		Female:	
	480	Male %	491	Female %
Under 1 year	8	4%	6	3%
1 year	9	5%	7	4%
2 years	5	3%	10	6%

Total Under 18 Years of age	181	100%	176	100%

Source: Census 2010 SF1

Median Age

The median age (point that splits the population where 50% are above and 50% are below) for the Fort McDowell Yavapai Nation members is 27 years, with males and females aged 26 and 27 years respectively. The median age of tribal members is lower than both the State (36 years) and the County 34 years. This statistic serves once more to emphasize the younger age profile of the Fort McDowell Yavapai Nation. See Figure 4.

Race

Not surprisingly, the majority of the Fort McDowell Yavapai Nation tribal members identify themselves as American Indian or Alaska Native alone (88%), while the remaining 12 percent are split between white alone and some other race alone and multi race persons. This stands in strong contrast to the State which is 73 percent white alone, and the County which is 73 percent white alone. See Table 6.

Table 6. Race

RACE:	Arizona		Maricopa County		Fort McDowell Yavapai Nation	
	Total Population	%	Total Population	%	Total Population	%

Source: Census 2010 SF1

Ethnicity

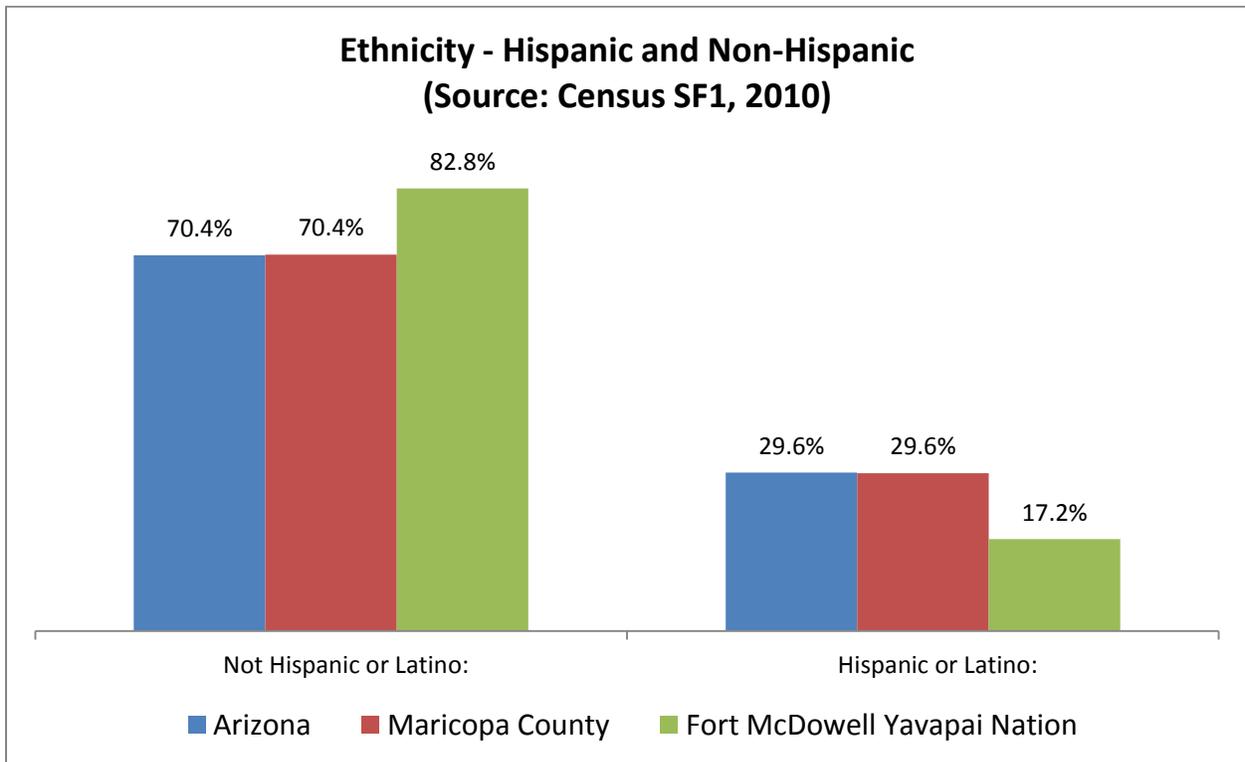

In terms of ethnicity, more than one-tenth (17.2%) of the Fort McDowell Yavapai Nation tribal members, self-identify themselves as Hispanic or Latino. This is lower than the State and the surrounding County where 29.6% percent of individuals self-identify as Hispanic or Latino. See Table 7, and Figure 5.

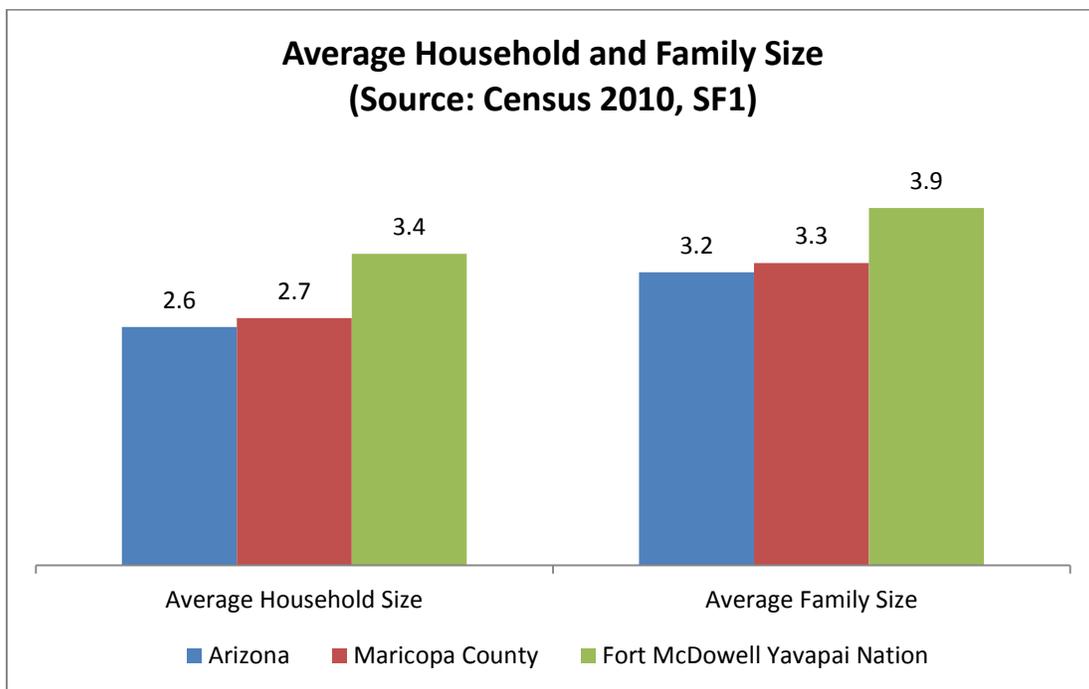

Figure 5. Ethnicity

Households

In 2010, there were 283 households on the Fort McDowell Yavapai Nation, with an average household size of 3.4 persons and an average family size of 3.9 persons as well. The average household size of 3.4 persons is larger than the State average (2.6 persons) and larger than the County average (2.7 persons). The average family size for tribal members (3.9 persons) is also larger than the State and the County, where the average is 3.2 and 3.3 persons respectively. See Figure 6.

Figure 6. Average Household and Family Size

The next portion of this analysis concerns households and their structure. The Census, defines as “household” as a person or group of people who occupy a housing unit. The “householder” is a person in whose name the housing unit is owned, being bought, or rented. A “family household” consists of a householder and one or more people living together in the same household who are related to the householder by birth, marriage, or adoption — it may also include people unrelated to the householder. If the householder is married and living with his/her spouse, then the household is designated a “married-couple household.” The remaining types of family households not maintained by a married couple are designated by the sex of the householder. A “nonfamily household” consists of a person living alone or a householder who shares the home with nonrelatives only; for example, with roommates or an unmarried partner.

Family households (74.6%) predominate on the Fort McDowell Yavapai Nation, traditional married couple families are however in the minority (27.2%) lower than the State (48.1%) or the County (47.8%). Households headed by a female head of household (single moms) account for almost one-third (31.1%) of all households. Half (58.3%) of all households are either married couple families (27.2%) or households headed by single mothers (31.1%). Other household structures include non-family households (25.4%), the majority of whom are unmarried partner households (12.4%). See Table 8 and Figure 7.

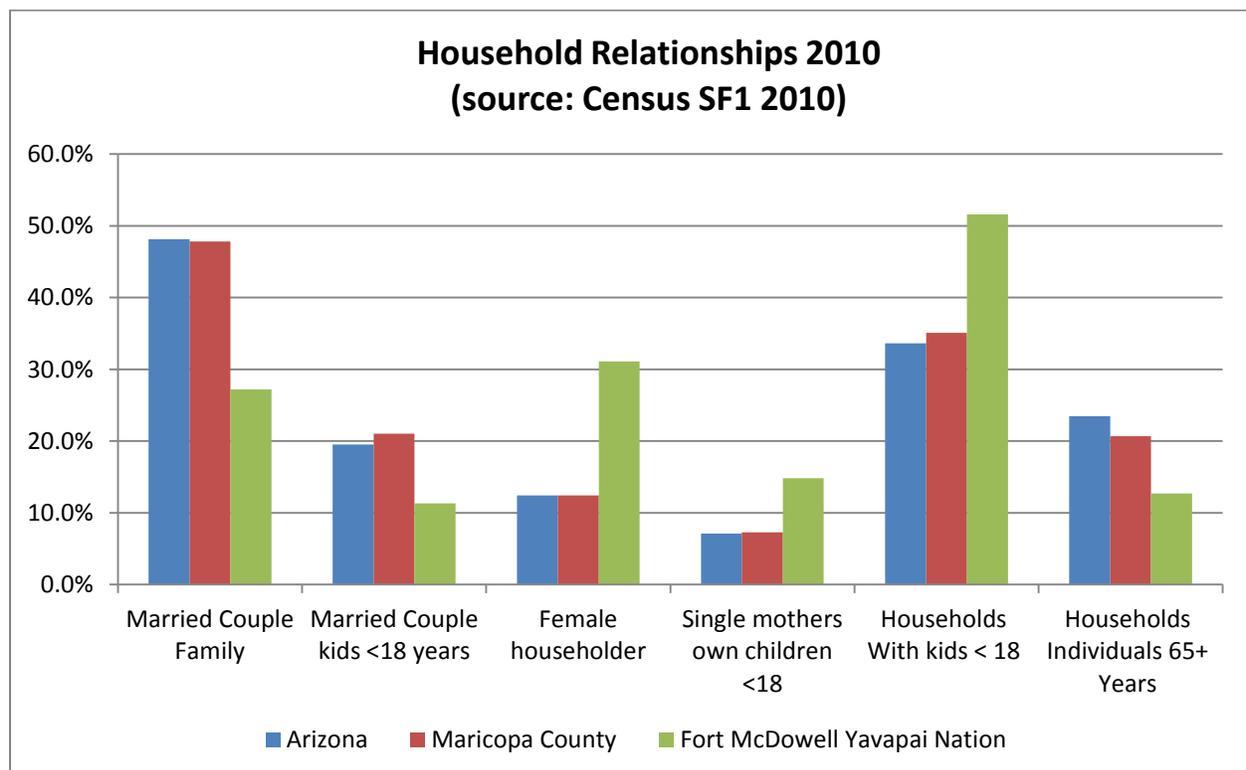

Table 8. Household Structure

Average Household Size	3.0		2.7		3.4	
Average Family Size	3.0		3.3		3.9	

Source: Census 2010 SF1

Unmarried partner households (12.4%) occur at a slightly higher rate in the Fort McDowell Yavapai Nation than at the State (7.8%) or the County (7.9%). Householders with a member over age 65 account for slightly more than half (51.6%) of all households, occurring at a higher rate than the County (35.1%) and the State (26.4%). Finally, tribal households are more likely to be headed by a single mother with their own children under age 18 (14.8%) than the State (7.1%) or the County (7.3%).

Figure 7. Household Relationships

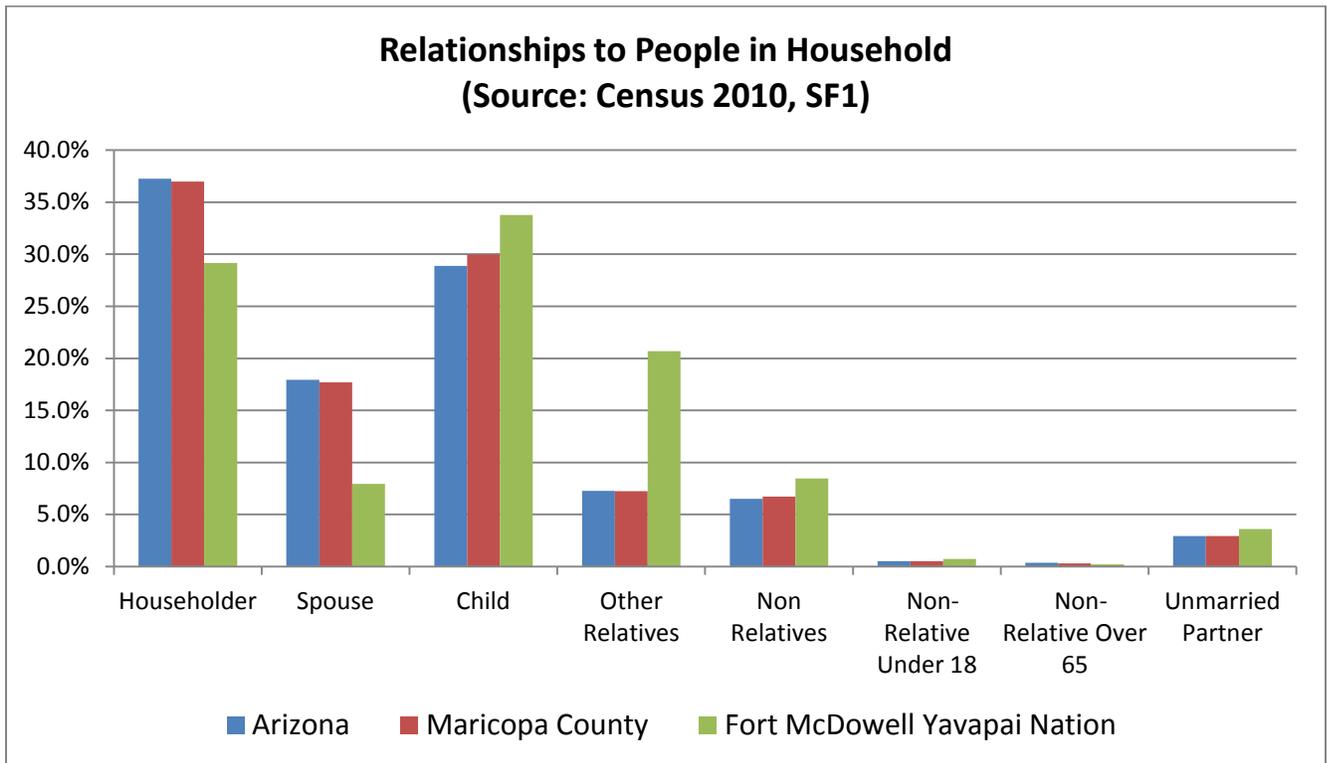

In terms of household characteristics 29.1 percent of all households are headed by a householder, lower than the State (37.2%) or the County (37.0%). Spouse headed households comprise a minority of Fort McDowell Yavapai Nation tribal households (7.9%) far less than the State (17.9%) or the County (17.7%). Children comprise almost one-third of all households (33.8%), similar to the State (28.9%) or the County (30.0%). See Table 9 and Figure 8.

Figure 8. Household Structure

Family households dominate among Fort McDowell Yavapai Nation tribal members (75%), compared to 66 percent for the State and the County. Non-family households account for one fourth (25%) of tribal member households more than the State or County (34%). Husband and wife families account for one-third (36%) of households, whereas residents of the State (73%) and the County (72%) are more than twice as likely to live in husband and wife households. Households on the Fort McDowell Yavapai Nation are three times more likely to be headed by a female householder (42%) with no husband present. Households headed by single mothers are far less prevalent at the State or County (12%). Households on the Fort McDowell Yavapai Nation are almost twice as likely (52%) to have children under the age of 18 living in the household, than the State (34%) and the County (34%). See Table 10, and Figure 9.

Children Under 18 Years Age Living with Grandparent

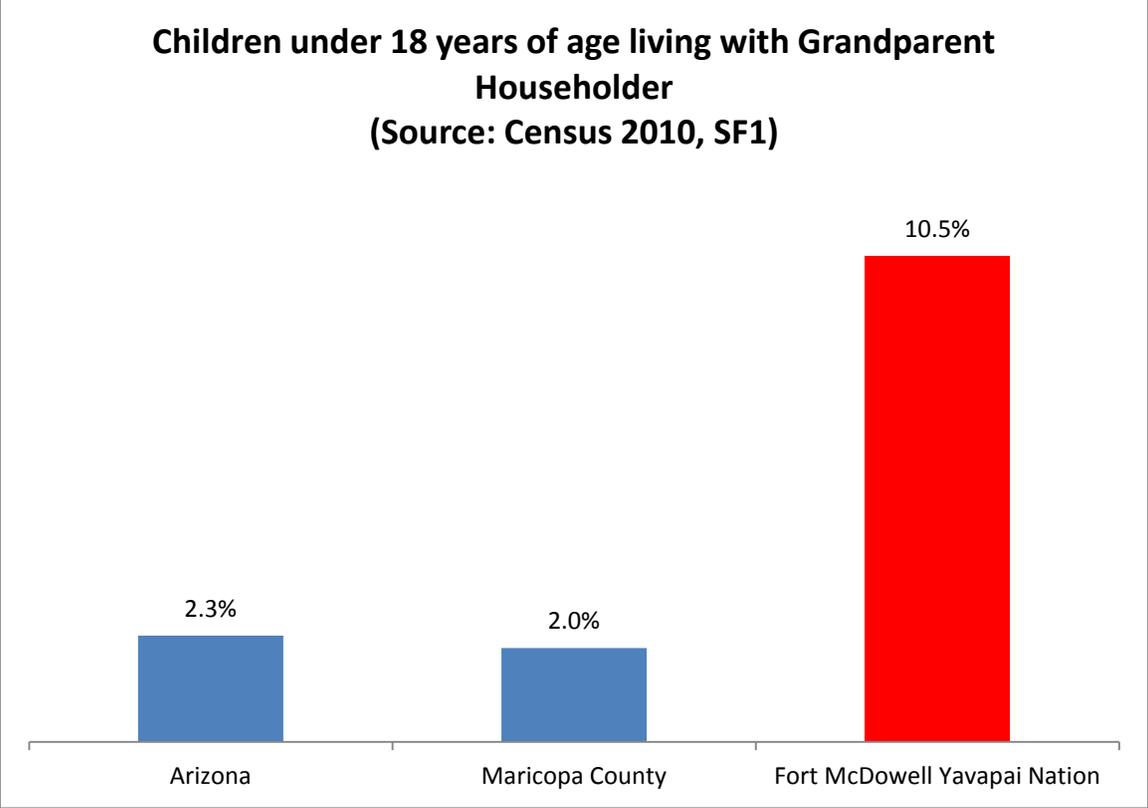

Children under age 18 are five times as likely to live with grandparents on the Fort McDowell Yavapai Nation (10.5%) than they are at the State (2.3%) or in the County (2.0%). There are few differences between the proportions of children by age living with grandparents, when comparing the Fort McDowell Yavapai Nation, the State or the County. See Table 11 and Figure 10.

Presence of Multigenerational Households

Households on the Fort McDowell Yavapai Nation are two times more likely to be multigenerational (13.8%), than the State (4.9%) and the County (4.7%). The Census defines multigenerational families as family households consisting of more than two generations, such as a householder living with his/her children and grandchildren. Multigenerational family households may be more likely to reside in areas where new immigrants live with their relatives, in areas where housing shortages or high costs force families to double up their living arrangements, or in areas that have relatively high rates of out-of-wedlock childbearing. See Figure 11.

Figure 11. Presence of multigenerational households

Household Income

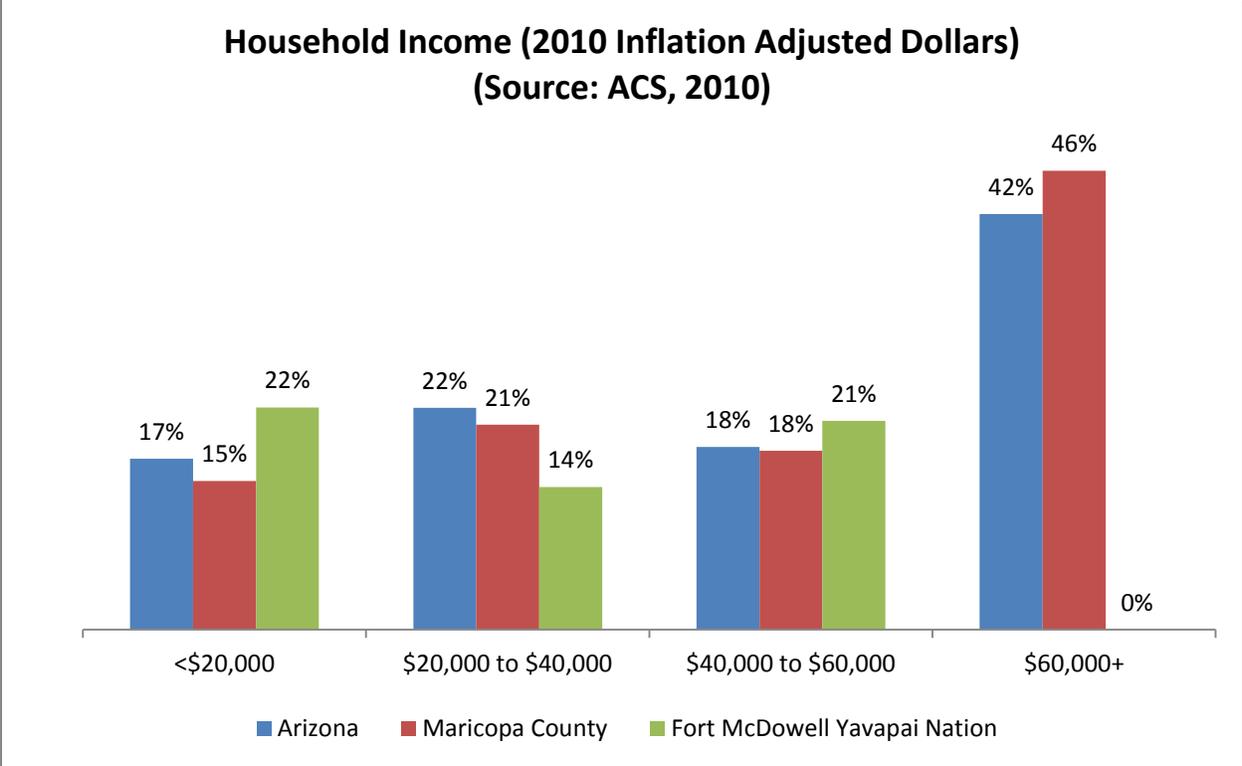

The median household income for the Fort McDowell Yavapai Nation is \$51,157, less than the County (\$55,054) and slightly less than the State (\$51,310). Tribal members are more likely to have lower household incomes than both the State and the County. In fact households are twice as likely to have incomes of less than \$20,000 (22%) than is the State (17%), and the County (15%). Tribal members are less likely (14%) to have household incomes between \$20,000 and \$40,000 and \$40,000 and \$60,000 as the State and the County. No tribal members have incomes in excess of \$60,000. See Table 12, and Figure 12.

Poverty

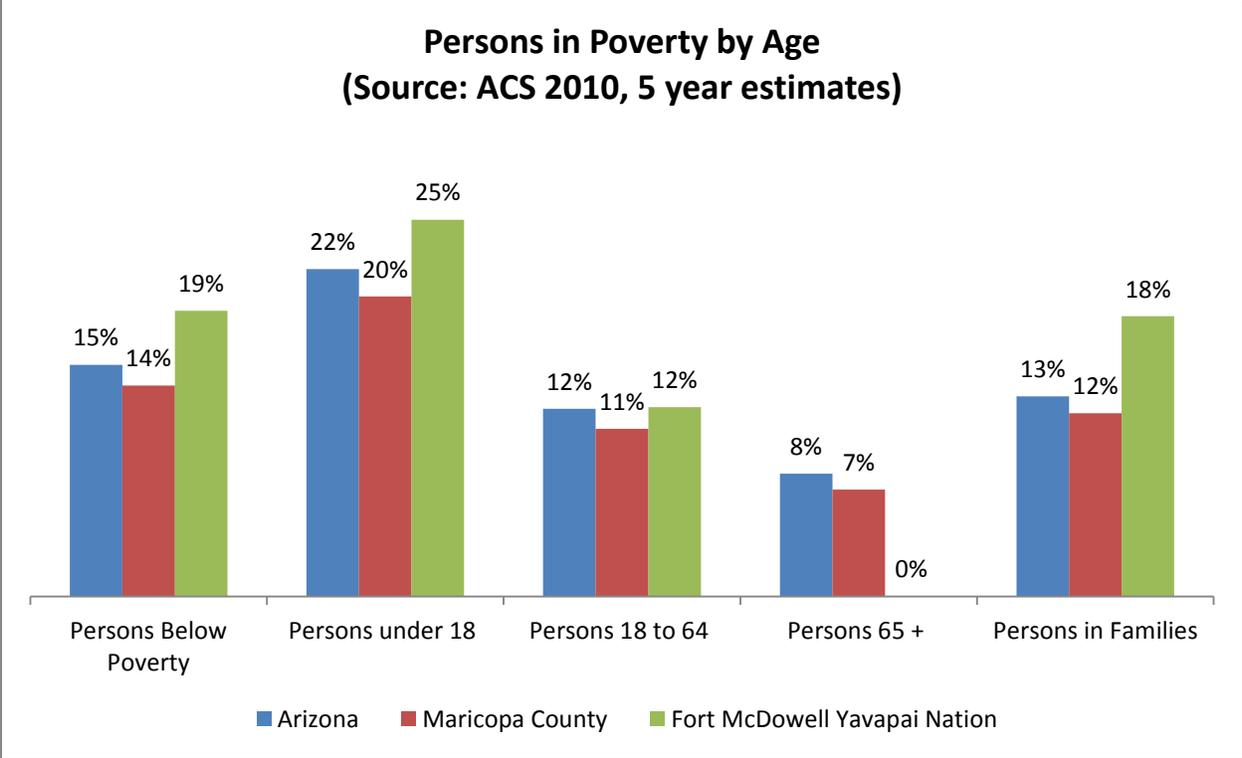

Poverty rates on the Fort McDowell Yavapai Nation (19%) are slightly higher than the State (15%) and the County (14%). One-fourth (25%) of all children under 18 years of age are considered to be living in poverty, while one-tenth (12%) of tribal members between 18 and 64 also live in poverty. One-fifth (18%) of persons living in families on the Fort McDowell Yavapai Nation live in poverty, a much higher rate than families in poverty at the state level (13%) or the County (12%). See Table 15 and Figure 14.

Children in Poverty

The rates of children under 18 years of age living in poverty are higher for the tribe (19%) than for the State (15%) or the County (14%). The highest poverty rates for tribal members are recorded for those children between 6 and 17 years of age, where 32 percent of these school age children live below the poverty level. See Table 16.

Households in Poverty

The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. If a family's income is less than a family's threshold, then that family and every individual in it, is considered poor. Further the ratio of income to poverty can be used to measure the degree or depth of poverty. The ratio of income to poverty compares a person's income with their poverty threshold, and expresses the comparison as a fraction. For example, a poverty ratio of 1.0 (income at 100% of poverty level) means a person is living right at the poverty line; a ratio of 0.5 (income at 50% of poverty level) would mean that a person is living in a household making only half the income designated as the poverty threshold. The Census Bureau describes those with family incomes below one half of their poverty threshold as being "severely poor." People with incomes at or above their threshold but below 125 percent of their threshold are classified as "near poor."

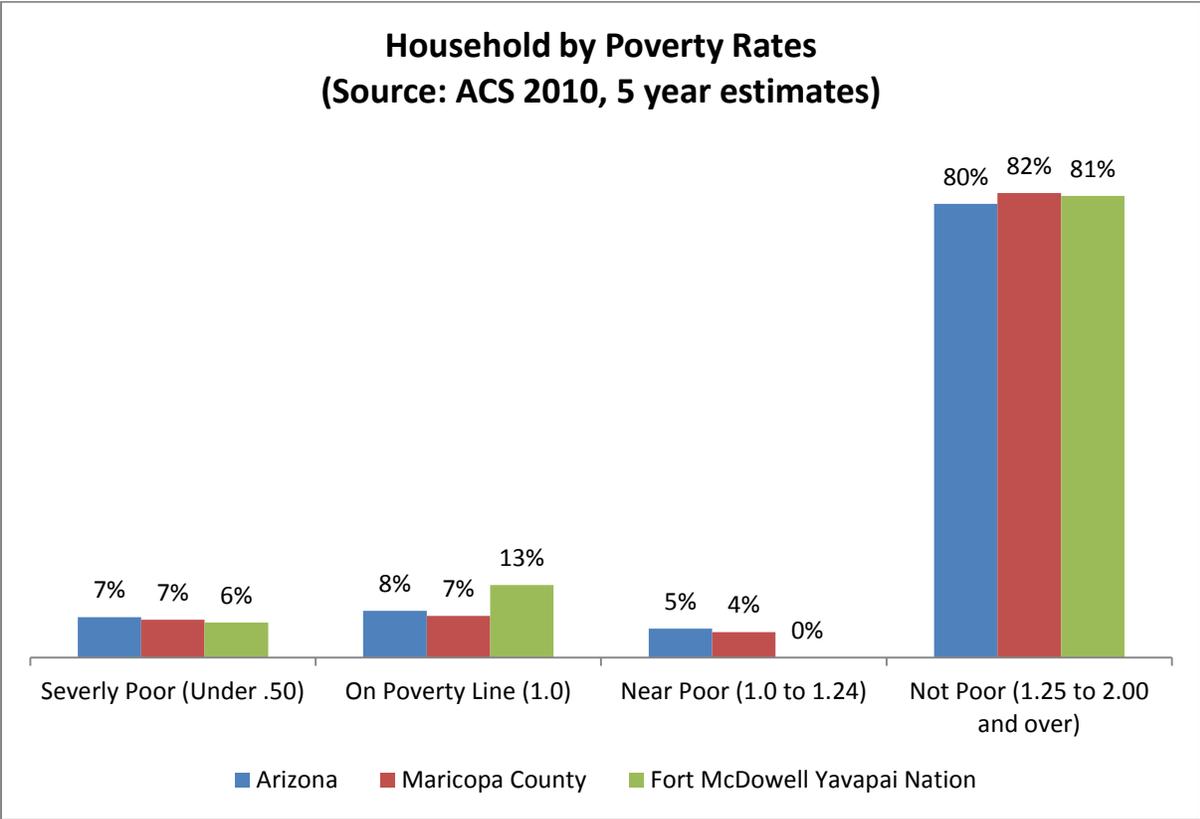

One-fifth (19%) on the Fort McDowell Yavapai Nation are classified as "severely poor," with poverty ratios that ranges from below 0.5 to .99. These rates are higher than those of the State (15%) or the County (14%). No residents are classified as "near poor" with poverty ratios between 1.00 and 1.24, double that of the of the State and County. The data indicates that 19 percent of households are below the poverty line, while the remaining 81 percent are located above the poverty line. See Table 17 and Figure 15.

Figure 15. Households by Poverty Ratios

Households Receiving Supplemental Nutrition Assistance Program (SNAP)

Less than two percent of all households (1.7%) on the Fort McDowell Yavapai Nation tribal members receive assistance from the Supplemental Nutrition Assistance Program (SNAP). This rate is much lower than the State (9.1%) or the County (7.6%). The proportion of elderly, those over 65 years of age, receiving SNAP assistance (1.3%) is a lower proportion for the same age groups than for the State (2%) or County (1.4%). See Table 18.

Table 18. Households Receiving SNAP Assistance

	Arizona	Maricopa County	The Fort McDowell Yavapai Nation
Total Households	2,326,468	1,382,002	299

Fertility

The birth rate for women between the ages of 15 and 50 years for the Fort McDowell Yavapai Nation is 12.2 percent twice the rate of the County and the State (6.2%). The proportion of unmarried women giving birth on the Fort McDowell Yavapai Nation (17.8%) is four times the level of the State (4.3%) and the County (4.2%). See Table 19 and Figure 16.

**APPENDIX C:
THE FORT MCDOWELL YAVAPAI NATION
AMERICAN COMMUNITY SURVEY 2010, 5-YEAR ESTIMATES
MARGIN OF ERROR ESTIMATES**

ACS Margin of Error Estimates

The ACS estimates are based on data from a sample of housing units and people in the population, not the full populations. For this reason, ACS estimates have a degree of uncertainty associated with them, called sampling error. In general, the larger the sample, the smaller the level of sampling error. The ACS calculates standard errors for each estimate produced and publishes the 90 percent confidence level margins of error (the Census Bureau standard). You can be 90 percent confident that the interval within the margin of error from the estimate includes the true value. Users can add and subtract the margin of error value from the estimate to find the top and bottom of the range within which the ACS is 90 percent confident in their estimate lies.

Understanding margin of error

A term you will often come across in survey research is "within the margin of error." Most people hear the term frequently during election season when results from polls are reported. Many surveys and polls collect data from a representative sample of a population to make determinations about a larger population. Results would be somewhat different each time the survey is administered to a different representative sample. The margin of error accounts for these differences by calculating an upper and lower boundary the true result would likely fall between if every member of population was surveyed.

For example, in the case of the Fort McDowell Yavapai Nation the ACS has established that there are 299 households represented on the Fort McDowell Yavapai Nation Reservation. The survey also indicates that there are 248 family households (families) with a margin of error of plus or minus (\pm) 9.7 percent and 82.9 percent of the respondents responding indicated that they were in fact family households. The margin of error tells us that if the same survey were administered to the Fort McDowell Yavapai Nation Tribal members again, it is highly probable that the percent of "family household" responses would be between 73.2 percent and 92.6 percent, or 82.9 percent \pm 9.7 percent.

Total housing units	304	+/-43	(X)	(X)

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an

open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A

statistical test is not appropriate.

6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of

sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.
