Fort Mojave Indian Tribe Demographic Analysis

Introduction

This analysis of Fort Mojave Indian Tribe was undertaken by the Arizona Rural Policy Institute (ARPI) in the W.A. Franke College of Business at Northern Arizona University for the planning department of Fort Mojave. The ARPI has produced the Demographic Profile for Fort Mojave Indian Tribe using the latest information available from the 2010 Census and the 2010 American Community Survey (5-year estimates). Once the American Community Survey (ACS) data estimates for the 5-year 2006-2010 series became available the ARPI completed the analysis, which follows in the document. This document is provided to Arizona tribes as a product of the EDA Technical Assistance grant provided by the EDA to the ARPI at Northern Arizona University.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties. Therefore, this report incorporates two major data sources. First, the official 2010 Census, primarily from the SF1 data report to produce data on the population, age, race and ethnicity relative to the Fort Mojave Reservation. The second data source is the American Community Survey, 5-year estimate data for the period 2006 to 2010 and is annotated in the document as ACS 2010 (5-year estimates). The 2010 ACS 5-year estimates are based on data collected between January 2006 and December 2010. The data were used to analyze household income, poverty rates, employment, language use and household characteristics for Fort Mojave Indian Tribe. Only the 5-year estimates are used as the data was provided for small geographic areas, representing the average characteristics over the 5-year period.

The analysis of demographics for Fort Mojave Indian Tribe first examines the 2010 Census and then the American Community Survey where data is available. Demographic characteristics are outlined by three separate levels, the State of Arizona, Mohave County and Fort Mojave. Comparisons between the State of Arizona and Mohave County serve to provide further levels of comparison when examining demographic characteristics of the tribe versus the County and the State.

Appendix C in this document contains the margins of error used to calculate the estimates for the ACS.

Population

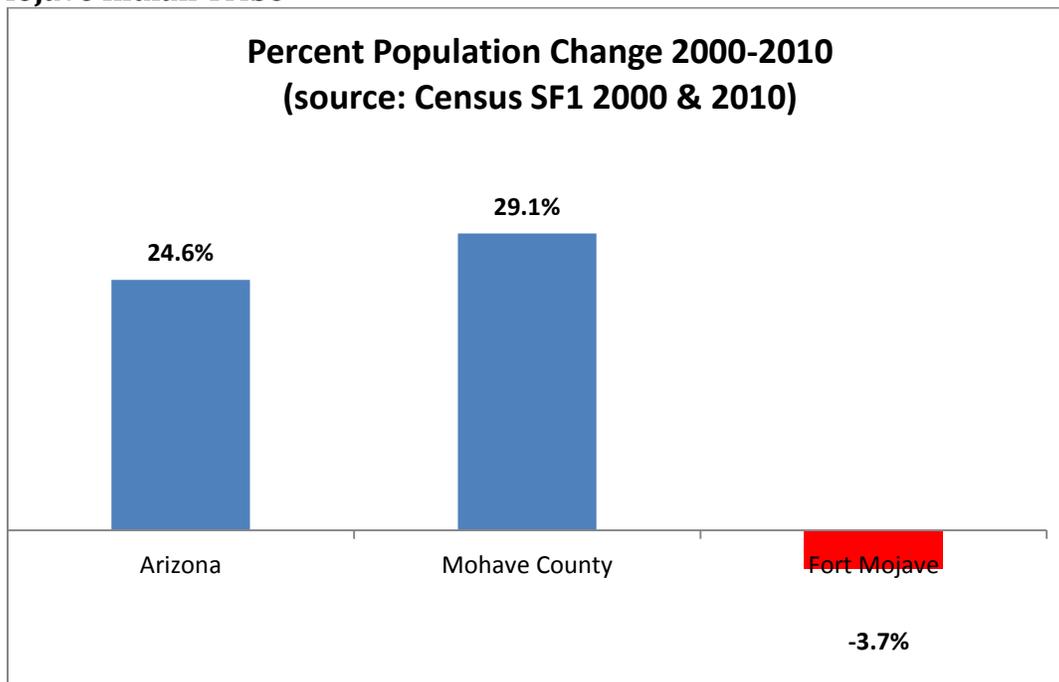

The population of the Fort Mojave Indian Tribe decreased slightly (-3.7%) in 2010 when compared to 2000. This decrease indicates that there are 39 fewer tribal members in 2010 than in 2000. This decrease in tribal members, however, may not truly reflect the actual change in the tribal populations between the census periods. The SF1 census is considered the official count, and accounts for only the population within the exterior boundaries of the tribal lands or nation. Both the State (24.6%) and the County (29.1%) grew significantly between the last census in 2000 and 2010. The rate of population growth is higher in the County (29.1%) than the State (24.6%).

Table 1. Total Population & Trends

Total Population and Trends	Arizona	Mohave County	Fort Mojave
Total Population 2000	5,130,632	155,032	1,043
Total Population 2010	6,392,017	200,186	1,004
Change in Population 2000-2010	24.6%	29.1%	-3.7%

Source: Census 2000, 2010 SF1

Figure 1. Percent Population Change 2000 to 2010 Arizona, Mohave County & the Fort Mojave Indian Tribe

Gender

There are more females (53.4%) than males (46.4%) within Fort Mojave Indian Tribe. The gender ratios in Fort Mojave are lower for males in either the State (49.7%) or the County (50.0%). Females (53.4%) comprise a larger proportion of the population among Fort Mojave tribal members than in either the State (50.3%) or the County (50.0%).

Table 2. Gender Ratios

Males	3,175,823	100,078	468
Females	3,216,194	100,108	536

Source: Census 2000, 2010 SF1

Age

No age group dominates the age structure of the Fort Mojave Indian Tribe, which is in contrast to some other Arizona tribes which tend to be more heavily weighted towards younger tribal members. The under-18 year population accounts for 27.4 percent of all tribal members, representing a similar proportion of tribal members as the State (25.5%) and Mohave County (20.6%). The fact that more than one-fourth of the tribe is younger than 18 years of age carries with it some fairly important policy implications. The large portion of younger tribal members influences the provision of health and educational services as well as poverty and workforce issues as well.

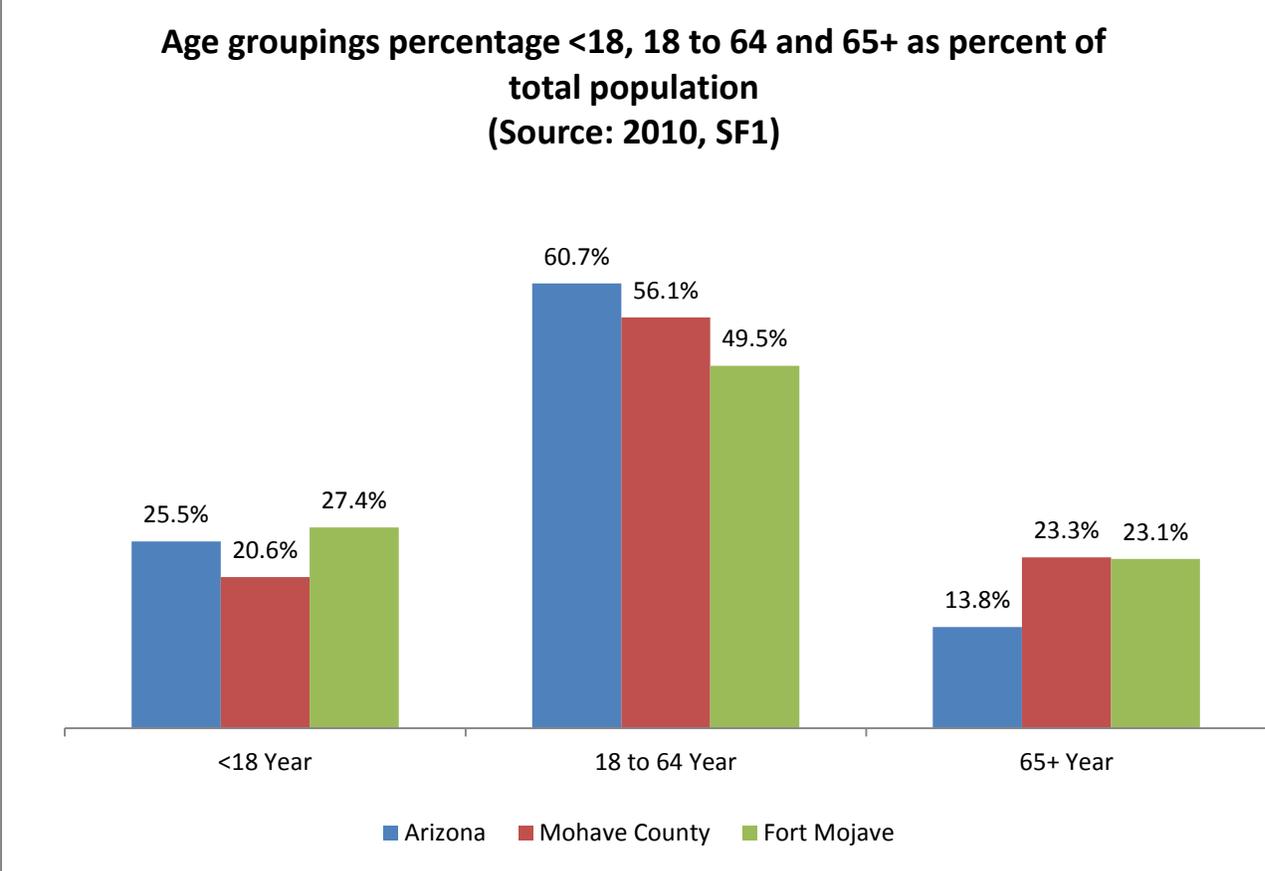

On the other hand, the tribe has one-fourth (23.1%) of members who are 65 years or older. This age group, of those who have retired and are out of the workforce, accounts for a larger portion of tribal members than most other Arizona tribes. The 65-plus age group appears in a higher proportion than the state (13.8%) and at a similar level to the county (23.5%). The age profile of the Fort Mojave Indian Tribe is somewhat different to other Arizona tribes with its larger older population and smaller youth population. Finally, those age 18 to 64 years account for 49.5 percent of the tribal members, which is lower than the State (60.7%) and the County (56.1%). The large number of tribal young persons and elderly population will have an effect on the development of the tribal workforce in the future. See Table 3, and Figure 1.

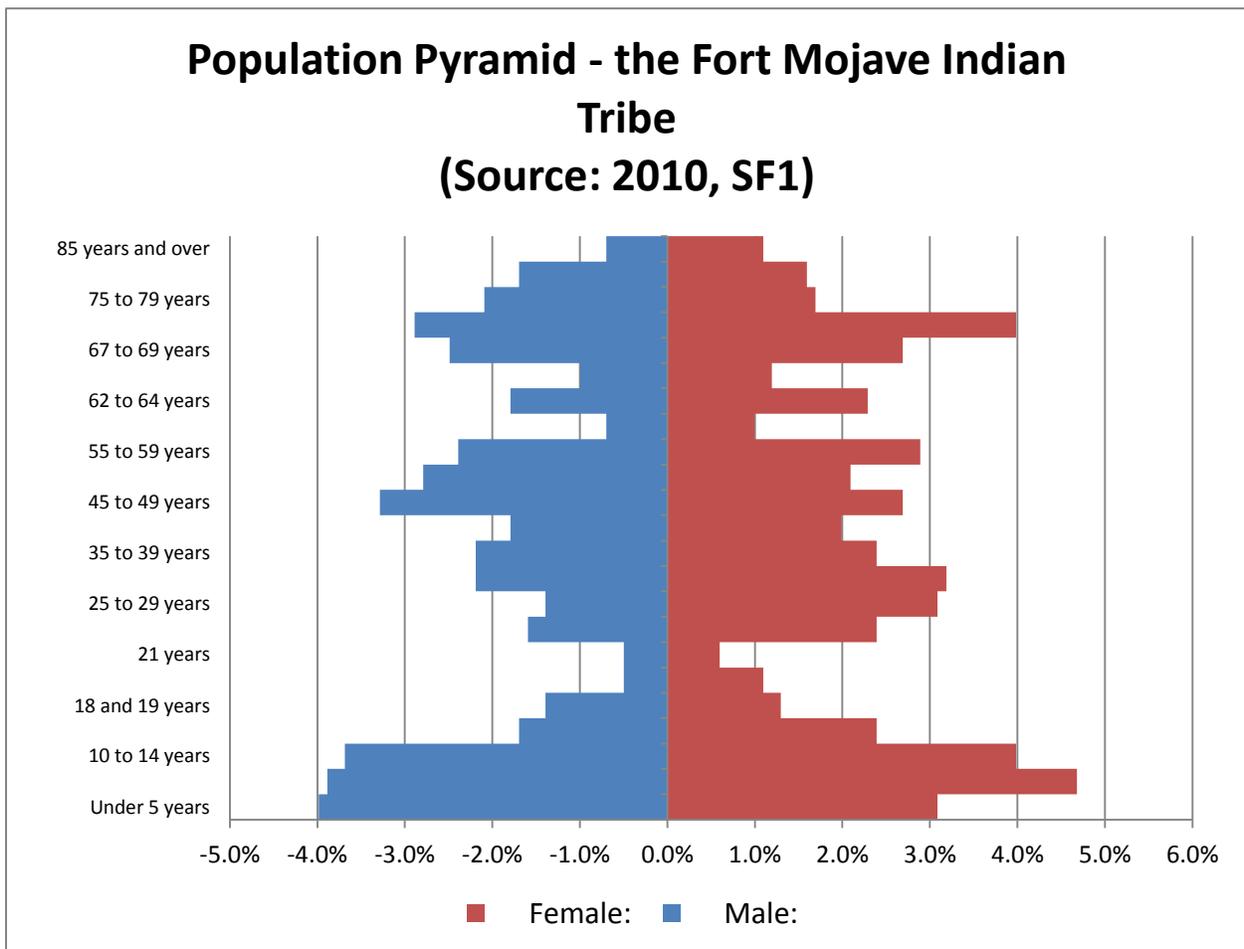

Figure 2. Age Cohorts for Arizona, Mohave County & Fort Mojave Indian Tribe 2010

A population pyramid, also called an age structure diagram, is a graphical illustration that shows the distribution of various age groups in a population (typically that of a country or region of the world), which forms the shape of a pyramid when the population is growing.

The population pyramid below (Figure 3) illustrates the difference between males and females for the 5-year age cohorts. The under-18 age cohorts are symmetrical indicating that there are a somewhat even number of males and females. The population between 20 and 21 years of age represent a small part of the distribution. At the top of the age pyramid there are slightly more females than males. This is also a demographic reality as women tend to live longer than men. The age pyramid provides an illustrated snapshot of the age structure of the tribal members at the time of the 2010 census.

Figure 3. Population Pyramid - Fort Mojave Indian Tribe 2010

Population Under 18 Years

Children under 18 years of age account for 27.0 percent of all tribal members. There are 468 males and 536 female tribal members; of these 28.4 percent are males under age 18 and 26.5 percent are females under age 18. There are more males under age 5 (36.8%) than females (28.2%), while there are more females (38.0%) than males (36.8%) between 5 and 10 years of age. The sex ratio is similar for the 11 to 17 year age cohort, where there are more females (28.2%) than males (21.8%). See Table 4.

Table 4. Single year age by gender for those under 18 years of age

Source: Census 2010 SF1

Median Age

The median age (point that splits the population where 50% are above and 50% are below) for Fort Mojave Indian Tribe members is 39 years, with males slightly older at 41 years and females at 37 years. The median age of tribal members is close to the state median age (36 years) but considerably lower than the County (48 years). This once more serves to emphasize the overall mixed age distribution of tribal members. See Figure 4.

Race

Somewhat surprisingly, a minority of Fort Mojave Indian tribal members identify themselves as American Indian or Alaska Native alone (40%), while the remaining 60 percent are split between white alone a(42%), some other race alone (9%) and multi-race persons (7%). This is strong contrast to the State which is 73 percent white alone, and the County which is 87 percent white alone. See Table 6.

Table 6. Race

RACE:	Arizona		Mohave County		Fort Mojave	
	Total Population	%	Total Population	%	Total Population	%

Source: Census 2010 SF1

Ethnicity

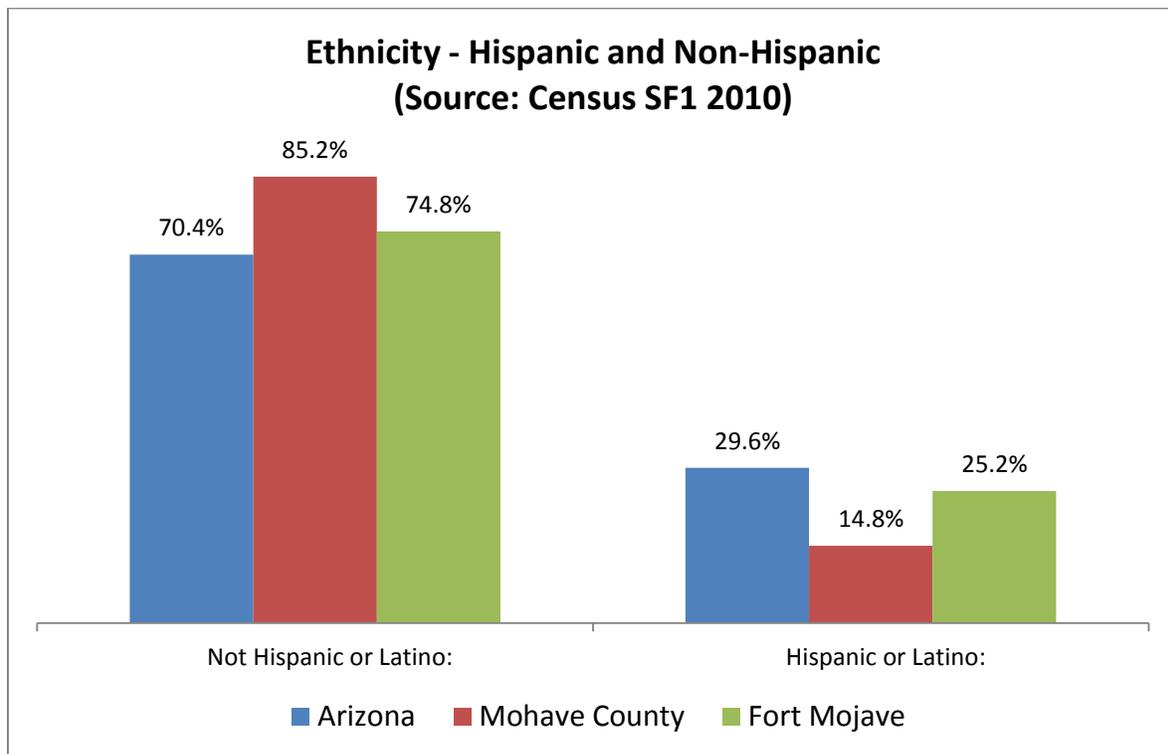

In terms of ethnicity, one-fourth (25.2%) of Fort Mojave Indian tribal members identify themselves as Hispanic or Latino. This is higher than the surrounding County where more than one-tenth (14.8%) identify themselves as Hispanic or Latino but lower than the State where 29.6 percent identify themselves as Hispanic or Latino. See Table 7 and Figure 5.

Figure 5. Ethnicity

Households

In 2010, there were 370 households in the Fort Mojave Indian Tribe, with an average household size of 2.7 persons and an average family size of 3.1 persons as well. The average household size of 2.6 persons is lower than the State average (3.0 persons) and larger than the County average (2.7 persons). The average family size for tribal members (3.1 persons) is slightly larger than the State (3.0 persons) and the County, where the average is 2.9 persons. See Figure 6.

A “household” is a person or group of people who occupy a housing unit. The “householder” is a person in whose name the housing unit is owned, being bought, or rented. A “family household” consists of a householder and one or more people living together in the same household who are related to the householder by birth, marriage, or adoption — it may also include people unrelated to the householder. If the householder is married and living with his/her spouse, then the household is designated a “married-couple household.” The remaining types of family households not maintained by a married couple are designated by the sex of the householder. A “nonfamily household” consists of a person living alone or a householder who shares the home with nonrelatives only; for example, with roommates or an unmarried partner.

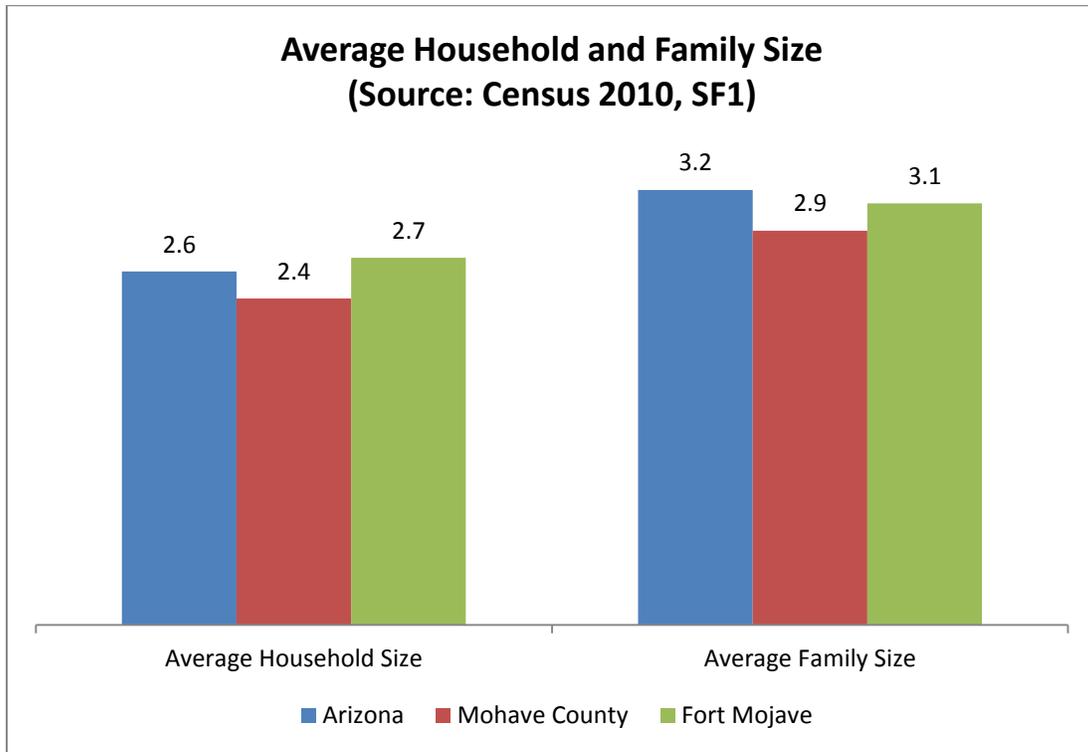

Family households (73.5%) predominate in the Fort Mojave Indian Tribe where traditional married couple families (49.7%) are similar to the State (48.1%) or the County (49.5%). Households headed by a single mother (19.1%) occur at twice the rate of the State and the County. More than two-thirds (68.9%) of all households are either married couple families (49.7%) or households headed by single mothers (19.2%). Other household structures include non-family households (26.5%) and unmarried partner households (10.8%). See Table 8 and Figure 7.

Source: Census 2010 SF1

Figure 6. Average Household and Family Size

Unmarried partner households (10.8%) occur at a higher rate than the State or the County where this type of household relationship occurs 7.8 percent of the time at the State level and 8.6 percent at the County level. Householders with a member over age 65 account for a larger percentage of the tribal population (34.9%) than similar age cohorts in the State (26.4%) and County (24.5%) populations. Finally, tribal households are more than three times as likely to have households headed by a single mother with their own children under age 18 (13.0%) than the State (7.1%) or the County (5.3%).

Figure 7. Household Relationships

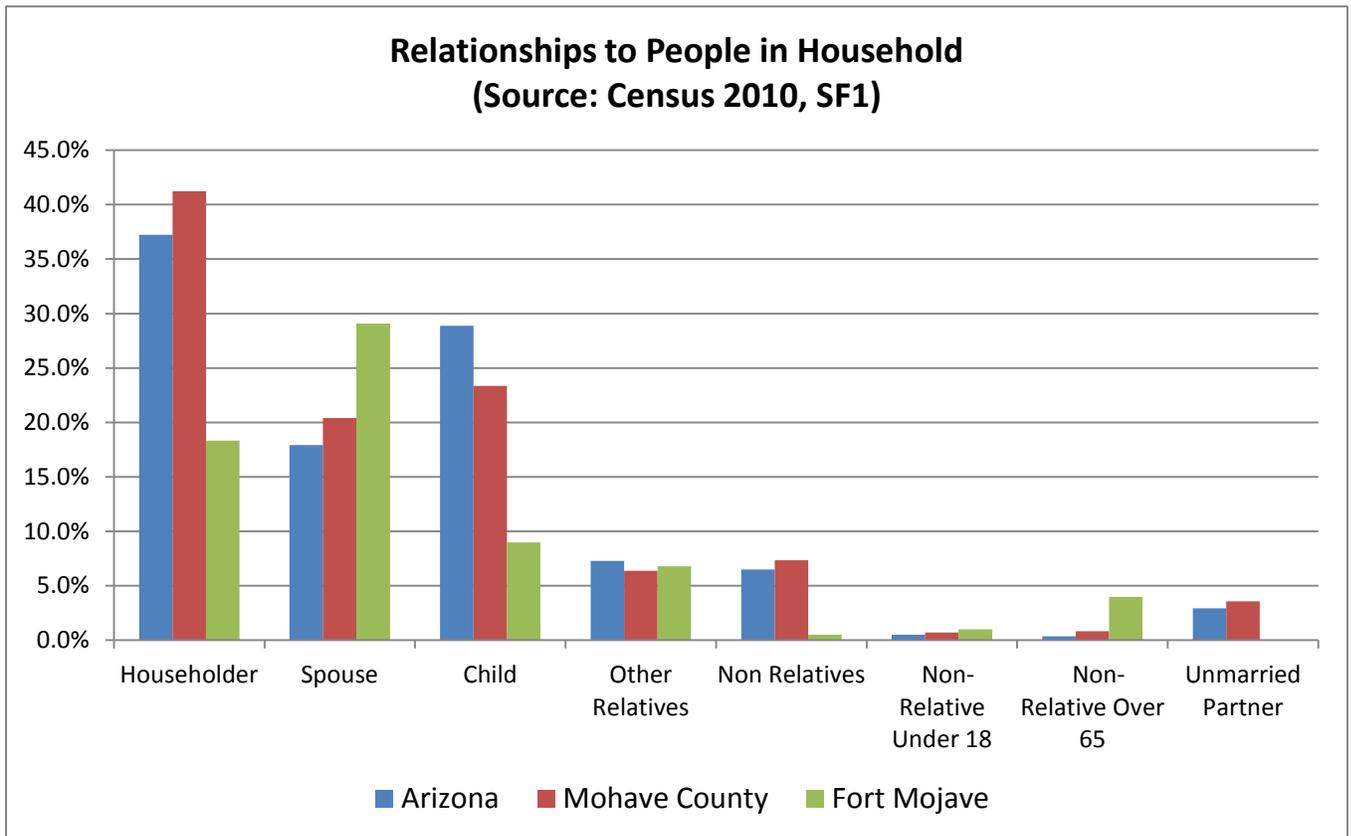

In terms of household characteristics 39.6 percent of all households are headed by a householder, similar to the State (37.2%) and the lower than the County (41.2%). Spouse headed households comprise a minority of Fort Mojave tribal households (18.3%) greater than the State (17.9%) and lower than the County (20.4%). Children comprise almost one-third of all households (29.1%), greater than the State (28.9%) or the County (23.3%). See, Table 9 and Figure 8.

Table 9. Household Structure

Source: Census 2010 SF1

Figure 8. Household Structure

Family households dominate among Fort Mojave tribal members (74%), compared to 37 percent for the State and 41 percent for the County. Non-family households account for one fourth (26%) of tribal member households, less than the State (34%) or County (35%). Husband and wife families account for only two-thirds (68%) of households, very similar to the State (73%) and the County (76%). Households on the Fort Mojave Reservation are twice as likely to be headed by a female householder (26%) with no husband present. Households headed by single mothers are far less prevalent at the State (12%) or County (10%). Households on the Fort Mojave Reservation have similar percentages of children under the age of 18 living in the household (35%) as the State (34%) and the County (25%). See Table 10, and Figure 9.

Children Under 18 Years of Age Living with Grandparent

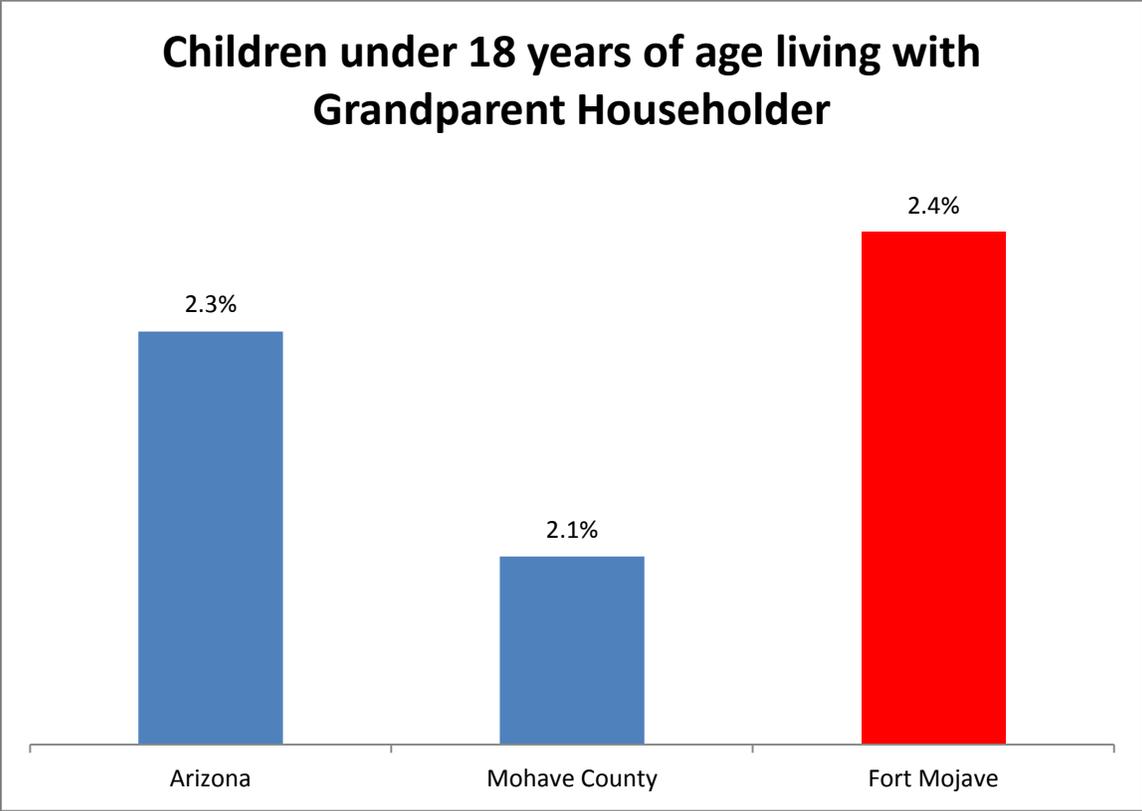

Children under age 18 living with grandparents on the Fort Mojave Indian Tribe (2.4%) occur at roughly the same rate as the State (2.3%) and the County (2.1%). There are few differences between the proportions of children by age living with grandparents; the only exception is that twice as many children 5 years of age live with their grandparents (12.5%) than do so at the State or County levels. See Table 11 and Figure 10.

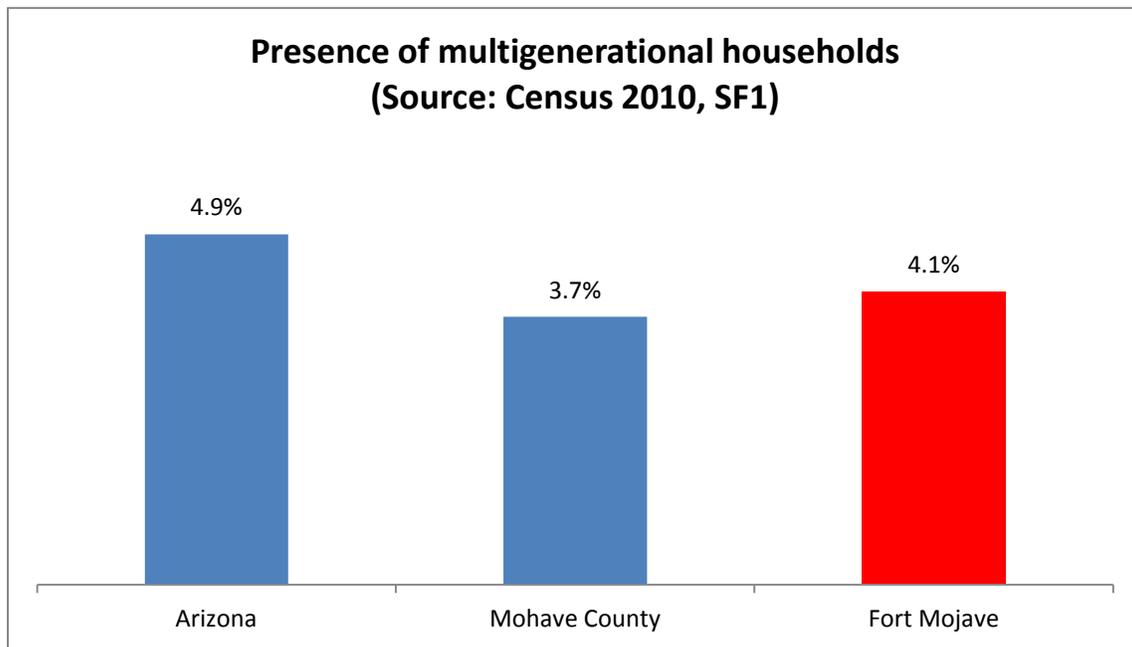

Figure 10. Percentage of children under 18 living with a grandparent householder

Presence of Multi-generational Households

Households on the Fort Mojave Indian Tribe are about as likely to be multi-generational (4.1%), as in the State (4.9%) or the County (3.7%). The Census defines multi-generational families as family households consisting of more than two generations, such as a householder living with his/her children and grandchildren. Multi-generational family households may be more likely to reside in areas where new immigrants live with their relatives, in areas where housing shortages or high costs force families to double up their living arrangements, or in areas that have relatively high rates of out-of-wedlock childbearing. See Figure 11.

Figure 11. Presence of multi-generational households

Household Income

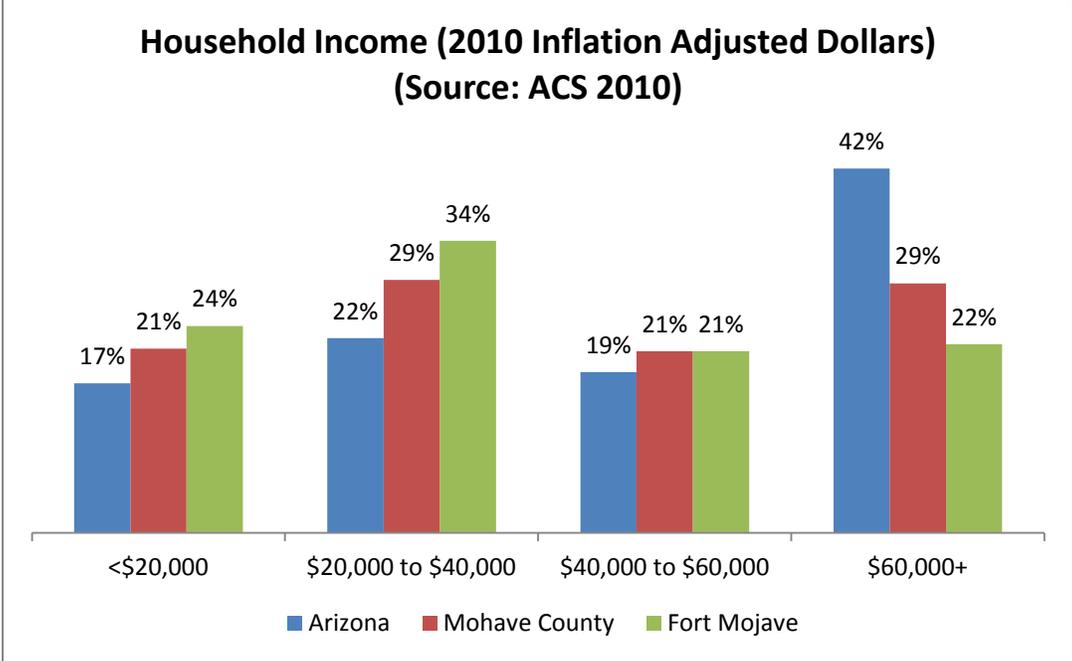

The median household income for members of the Fort Mojave Indian Tribe is \$33,424, less than both the County (\$39,785) and the State (\$50,448), thus tribal members are more likely to have lower household incomes than either the State or the County. In fact households are more likely to have incomes of less than \$20,000 (24%) than are residents of the State (17%) or the County (21%). Tribal members are also more likely (34%) to have household incomes between \$20,000 and \$40,000 than the State (22%) and the County (29%). Correspondingly, one fifth (21.7%) of tribal households have incomes over \$60,000, compared to the State (42%) and the County (29%). See Table 12, and Figure 12.

Figure 12. Percentage of household income by range

Supplemental Income

Households on the Fort Mojave Indian Tribe receive SNAP or food stamp assistance (10%) at roughly the same rate as the State (10%) and the County (12%). Households on the Fort Mojave Indian Tribe are twice as likely (51%) to receive Social Security income than residents of the State (29%) but rates within the County are about the same (45%). Fort Mojave households also tend to have more retirement income (29%) than the State (19%) but retirement income equal to the County (29%). See Table 13 and Figure 13.

Other Income

Per capita Income on the Fort Mojave Indian Tribe (\$15,706) is less than the per capita income for Mohave County (\$21,523) or the State (\$25,680). Correspondingly, the median earnings for workers (\$20,500) are lower than the County (\$22,472) and the State (\$29,573). See Table 14.

Table 14. Other Income Measures (In 2010 Inflation-Adjusted Dollars)

	Arizona	Mohave County	Fort Mojave

Poverty

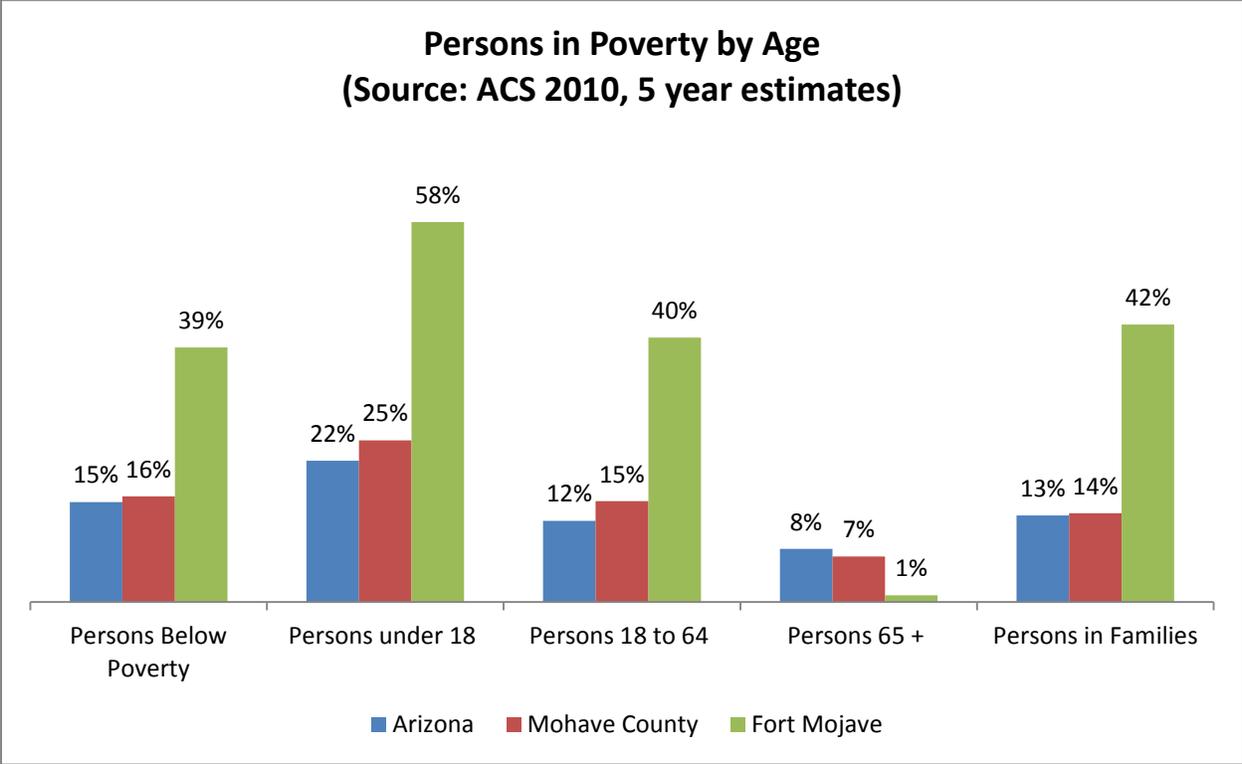

The poverty rate on the Fort Mojave Reservation (39%) is more than twice as high as the State (15%) and the County (16%). More than half (58%) of all children under 18 years of age are considered to be living in poverty, while two-fifths (40%) of tribal members between 18 and 64 also live in poverty. However, tribal members over 65 years of age (1%) are far less likely to live in poverty, than are those of their age group in the State (8%) and the County (7%). See Table 15 and Figure 14.

Children in Poverty

The poverty rates for children under 18 years of age are twice as high for the tribe (39%) than for the State (15%) or the County (16%). The highest poverty rates for tribal members are recorded for those children between 6 and 17 years of age, where 34 percent of these school-aged children live below the poverty level. See Table 16.

Households in Poverty

The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. If a family's income is less than a family's threshold, then that family and every individual in it, is considered poor. Further the ratio of income to poverty can be used to measure the degree or depth of poverty. The ratio of income to poverty compares a person's income with their poverty threshold, and expresses the comparison as a fraction. For example, a poverty ratio of 1.0 (income at 100% of poverty level) means a person is living right at the poverty line; a ratio of 0.5 (income at 50% of poverty level) would mean that a person is living in a household making only half the income designated as the poverty threshold. The Census Bureau describes those with family incomes below one half of their poverty threshold as being "severely poor." People with incomes at or above their threshold but below 125 percent of their threshold are classified as "near poor."

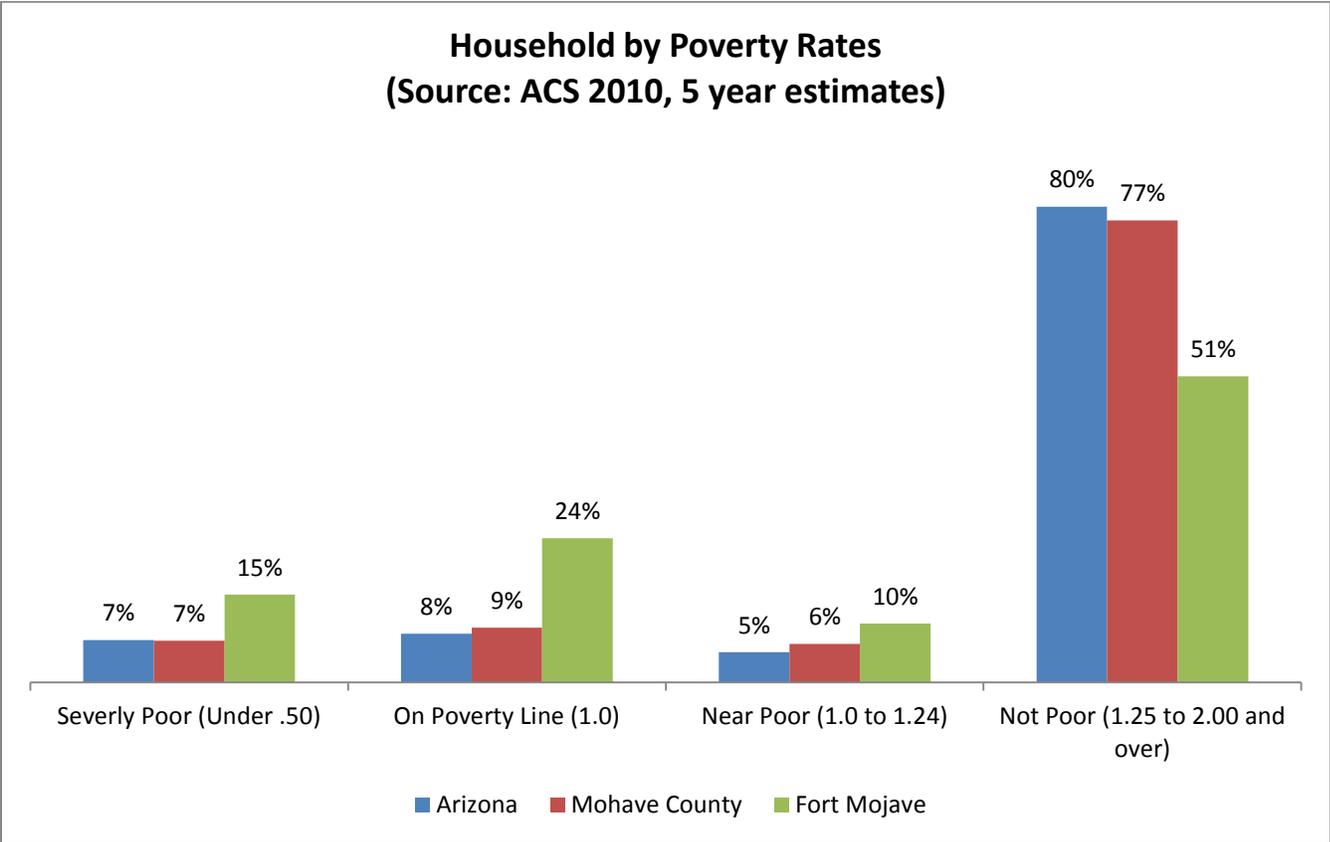

More than one-third of all households (39%) on the Fort Mojave Indian Tribe have a poverty ratio of between .5 and .99 or what the Census classes as "severely poor," a rate that is twice that of the State rate (15%) or the County (16%). A further 10 percent of tribal member are classified as "near poor" with poverty ratios between 1.00 and 1.24, lower than State (5%) or County (7%) rate. The data indicates that 39 percent of households are stuck in the severely poor poverty rate, while the remaining 51 percent of tribal households are found above the poverty line. See Table 17 and Figure 15.

Fertility

The birth rate for women between the ages of 15 and 50 years is lower for the Fort Mojave Indian Tribe (4%) than for the State (6%) or the County (6%). The proportion of unmarried women giving birth in the Fort Mojave Indian Tribe (0%) is lower than the State (5%) and the County (4%). See Table 19 and Figure 16.

Table 19. Fertility

	Arizona	Mohave County	Fort Mojave
Women 15 to 50 years old	1,509,650	38,255	235

APPENDIX C:

**FORT MOJAVE INDIAN TRIBE
AMERICAN COMMUNITY SURVEY 2010, 5-YEAR ESTIMATES
MARGIN OF ERROR ESTIMATES**

ACS Margin of Error Estimates

The ACS estimates are based on data from a sample of housing units and people in the population, not the full populations. For this reason, ACS estimates have a degree of uncertainty associated with them, called sampling error. In general, the larger the sample, the smaller the level of sampling error. The ACS calculates standard errors for each estimate produced and publishes the 90 percent confidence level margins of error (the Census Bureau standard). You can be 90 percent confident that the interval within the margin of error from the estimate includes the true value. Users can add and subtract the margin of error value from the estimate to find the top and bottom of the range within which the ACS is 90 percent confident in their estimate lies.

Understanding margin of error

A term you will often come across in survey research is "within the margin of error." Most people hear the term frequently during election season when results from polls are reported. Many surveys and polls collect data from a representative sample of a population to make determinations about a larger population. Results would be somewhat different each time the survey is administered to a different representative sample. The margin of error accounts for these differences by calculating an upper and lower boundary the true result would likely fall between if every member of population was surveyed.

For example, in the case of the Fort Mojave Indian Tribe the ACS has established that there are 577 households represented on the Fort Mojave Indian Tribe. The survey also indicates that there are 444 family households (families) with a margin of error of plus or minus (\pm) 7.2 percent and 76.9 percent of the respondents responding indicated that they were in fact family households. The margin of error tells us that if the same survey were administered to the Fort Mojave Indian Tribe members again, it is highly probable that the percent of "family household" responses would be between 69.7 percent and 84.1 percent, or 76.9 percent \pm 7.2 percent.

Less than \$100	21	+/-16	10.4%	+/-7.8
\$100 to \$199	14	+/-11	6.9%	+/-5.4
\$200 to \$299	38	+/-19	18.8%	+/-8.9
\$300 to \$399	73	+/-36	36.1%	+/-14.0
\$400 or more	56	+/-27	27.7%	+/-12.3
Median (dollars)	339	+/-26	(X)	(X)
SELECTED MONTHLY OWNER COSTS AS A PERCENTAGE OF HOUSEHOLD INCOME (SMOCAPI)				
Housing units with a mortgage (excluding units where SMOCAPI cannot be computed)	167	+/-46	167	(X)
Less than 20.0 percent	91	+/-37	54.5%	+/-12.5
20.0 to 24.9 percent	21	+/-13	12.6%	+/-8.2
25.0 to 29.9 percent	18	+/-15	10.8%	+/-8.9
30.0 to 34.9 percent	11	+/-15	6.6%	+/-8.3
35.0 percent or more	26	+/-15	15.6%	+/-8.8
Not computed	0	+/-119	(X)	(X)
Housing unit without a mortgage (excluding units where SMOCAPI cannot be computed)	194	+/-46	194	(X)
Less than 10.0 percent	89	+/-40	45.9%	+/-14.8
10.0 to 14.9 percent	36	+/-17	18.6%	+/-8.6
15.0 to 19.9 percent	19	+/-15	9.8%	+/-7.7
20.0 to 24.9 percent	19	+/-16	9.8%	+/-8.0
25.0 to 29.9 percent	23	+/-16	11.9%	+/-7.6
30.0 to 34.9 percent	2	+/-3	1.0%	+/-1.7
35.0 percent or more	6	+/-7	3.1%	+/-3.8
Not computed	8	+/-11	(X)	(X)

GROSS RENT				
Occupied units paying rent	175	+/-54	175	(X)
Less than \$200	18	+/-14	10.3%	+/-7.7
\$200 to \$299	2	+/-3	1.1%	+/-1.9
\$300 to \$499	22	+/-18	12.6%	+/-9.7
\$500 to \$749	49	+/-29	28.0%	+/-15.6
\$750 to \$999	24	+/-21	13.7%	+/-10.4
\$1,000 to \$1,499	47	+/-34	26.9%	+/-15.7
\$1,500 or more	13	+/-14	7.4%	+/-7.9
Median (dollars)	743	+/-71	(X)	(X)
No rent paid	33	+/-23	(X)	(X)
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	175	+/-54	175	(X)
Less than 15.0 percent	31	+/-22	17.7%	+/-11.1
15.0 to 19.9 percent	17	+/-18	9.7%	+/-9.3
20.0 to 24.9 percent	18	+/-14	10.3%	+/-8.1
25.0 to 29.9 percent	17	+/-15	9.7%	+/-8.3
30.0 to 34.9 percent	12	+/-12	6.9%	+/-7.4
35.0 percent or more	80	+/-41	45.7%	+/-17.1
Not computed	33	+/-23	(X)	(X)

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
