# TRIBAL CONSULTATION ANNUAL REPORT July 1, 2018 – June 30, 2018

### Agency Overview

The Arizona Department of Transportation (ADOT) is a multimodal transportation agency that is responsible for planning, designing, building, operating and maintaining the state highway system, of which approximately 1,200 miles traverse tribal lands. ADOT also provides assistance to 14 tribal airports and seven tribal public transit systems. The Department is committed to providing an efficient transportation system as well as protecting the safety and welfare of the traveling public. Additionally, ADOT is committed to work with and assist Native Nations/Tribes with the implementation of their transportation goals.

## <u>Tribal Government Consultation Policy and Tribal Liaisons</u>

ADOT's Tribal Consultation Policy MGT-16.01 is scheduled for review on September 14, 2018. The following goals refer to excerpts from this policy. The corresponding objectives and activities were conducted with oversight from various ADOT Sections. The Multimodal Planning Division (MPD) currently employs tow full time Tribal Liaisons.

Goal	Objective	Activity
Policy 1: Develop relationships with	Utilize the State Transportation	Tribal Liaisons outreach has been

Policy 7: ADOT, acknowledging funding and jurisdictional limitations, will work with Native Nations/Tribal Governments to identify available resources to jointly or individually fund projects to benefit the State and Native Nations/Tribal communities	Criminal Software (TraCs) Agreement. These two agreements are critical in collecting crash data used to justify the urgency of projects. However, the agreements have contained problematic language related to Sovereign Immunity, and ADOT needed to work out language acceptable to Native Nations/Tribes.  Encourage and consult with partner stakeholders to agree on funding joint projects.	for funding and services on some contracts.  Road Safety Assessment at the intersection of State Route 87 and Bureau of Indian Affairs (BIA) Route 15 resulted in a commitment from all partners, ADOT, the Navajo Tribe, BIA and Navajo County to provide resources to mitigate issues at this intersection.
Policy 3: Maintain and operate State owned transportation infrastructure within Native Nation/Tribal lands.	Ensure Native Nation/Tribes and District Engineers communicate on transportation needs in each respective District.	FY2018 maintenance funding expenditure was \$11,449,250 including employment to Tribal members working on-reservation land maintenance camps.
Policy 5: Consult during the transportation planning processes and implementation of the Statewide Transportation Improvement Program (STIP) in accordance with Federal Highway Administration (FHWA), Federal Transit Administration (FTA), and Federal Aviation Administration (FAA) policies and this policy.	Consult with each Native Nation/Tribe in the planning process that may affect Native Nation/Tribal lands  Coordinate with Department Planners and Native Nation/Tribal Governments on the State Transportation Improvement Program (STIP)	Tribal Liaisons assisted Project Managers on consultation requirements for two major studies: the I-11 Corridor and Sonoran Corridor Study.  FY2018 STIP project expenditures were \$51,493,001.02 of the \$104,689,189.51 obligated funds on state routes through tribal lands.
Policy 8: Conduct technical training to support planning, development, construction, maintenance, and operation of transportation facilities under Native Nation/Tribal jurisdiction.  Policy 12: Share appropriate	Consult with Native Nations/Tribes on training needs. In FY18, ADOT received requests for Commercial Driver's License classes, Functional Classification and Transportation Planning.  Coordinate training through various	ADOT's Business Engagement and Compliance Office (BECO) provided a number of classes, including CDL to increase the number of craftsperson on ADOT Highway construction projects. As a result, over 300 Tribal members were employed by contractors.
technical information and data with Native Nations/Tribal Governments. ADOT values reciprocity and encourages all Native Nations/Tribal Governments to share appropriate technical data with the State.  Policy 13: Assist with transportation programs by providing technical assistance and reference tools,	ADOT sections for successful Native Nation/Tribal Government transportation programs.  Provide Training workshops and presentation on the planning process to Native Nations/Tribes.	ADOT conducted a training session in Albuquerque, NM on GIS and Functional Classification to ensure eligibility for funding per FHWA.  ADOT conducted workshops on TraCs which collects crash data used to support and prioritize needs.

	through correspondences, meetings	
	and public outreach.	

### Challenges:

As Tribal Liaisons we would make a greater impact within the Agency if our planning activities could be extended to support more Divisions within ADOT. ADOT covers a vast number of services, including the Motor Vehicle Division (MVD).

ADOT has technical challenges for teleconference/videoconference capabilities on Tribal Nations as well as the number of meetings and proximity to next meeting location across the state.

#### Highlights:

ADOT has opted to remove standard contract language which has been a barrier in the past when executing agreements with Native Nations/Tribal Governments. This is a great step in moving forward with IGAs leading to obtaining data and developing infrastructure.

## Future Efforts/recommendations:

Increase access to funding applications and information to Tribes by sending hard copies. At the state level ADOT provides written documents, USBs for workshops and training material.

Require mandatory training for ADOT staff prior to working with Native Nations/Tribal Governments.
