2018-027	03-Jul-18	1	Cremation	AZ U:9:165(ASM)/La Plaza	Both GRIC and SRPMIC were notified and have attended the burial. These remains were north of baseline road and ought to be repatriated to SRPMIC.	GRIC 4T and SRP-MIC 4T
2018-033	03-Jul-18	1	Inhumation	AZ Q:2:47(ASM), and another site with no ASM number	A looted and heavily eroded burial excavated several years ago (likely 10+ years). An eroded looters pit is fronted by an eroded pile of backdirt. Material from the backdirt, including abundant fragmentary bone have eroded downslope and are strewn across an area measuring roughly 10 meters by 4 meters. A large reconstructable Seed Jar (Woodruff Brown type) is located 2 meters from the looters pit, away from the backdirt, and a large portion of a vesicular basalt ground stone pipe and a complete projectile point were observed in the backdirt. These artifacts are likely grave goods associated with the burial. Ceramics associated with the burial suggest a date between AD 500-650.	Zuni
2018-033	03-Jul-18	1	Inhumation	AZ Q:2:47(ASM), and another site with no ASM number	Burial eroding off the of the edge of a dune capped ridge. The burial appears to have been place in a midden. Articulated bone was observed in profile and abundant fragmentary bone is visible below the in-situ elements. Five olivella shell beads were observed just below the in-situ bone and are likely associated with the individual. Ceramics and material culture associated with the midden suggest a date between AD 300-500.	Zuni
