Colorado River Indian Tribes Demographic Analysis

Introduction

This analysis of the Colorado River Indian Tribes was undertaken by the Arizona Rural Policy Institute (ARPI) in the W.A. Franke College of Business, at Northern Arizona University for the planning department of the Colorado River Indian Tribes. The ARPI has produced the Demographic Profile for Colorado River Indian Tribes, with the latest information available from the 2010 Census and the 2010 American Community Survey (5 year estimates). This document is provided to Arizona tribes as a product of the EDA Technical Assistance Grant provided by the EDA to the ARPI at Northern Arizona University.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties. Therefore, this report incorporates two major data sources. First, the official 2010 Census, primarily from the SF1 data report to produce data on the population, age, race and ethnicity relative to Colorado River Indian Tribes. The second data source is the American Community Survey, 5-year estimate data for the period 2006 to 2010 and is annotated in the document as ACS 2010 (5 year estimates). The 2010 ACS 5-year estimates are based on data collected between January 2006 and December 2010. The data were used to analyze household income, poverty rates, employment, language use and household characteristics for Colorado River Indian Tribes. Only the 5-year estimates are used as the data was provided for small geographic areas, representing the average characteristics over the 5-year period.

The analysis of demographics for the Colorado River Indian Tribes first examines the 2010 Census and then the American Community Survey where data is available. Demographic characteristics are outlined by three separate levels, the State of Arizona, La Paz County and the Colorado River Indian Tribes. Comparisons between the State of Arizona and La Paz County serve to provide further levels of comparison when examining demographic characteristics of the tribe versus the County and the State. La Paz County was chosen as the reference county as all Colorado River Indian tribal lands and communities fall within the County.

Appendix A contains official Census 2010 data and Appendix B contains American Community Survey data (5 Year Estimates) and Appendix C contains the margin of error estimates to be used to calculate the estimates for the American Community Survey data.

Population

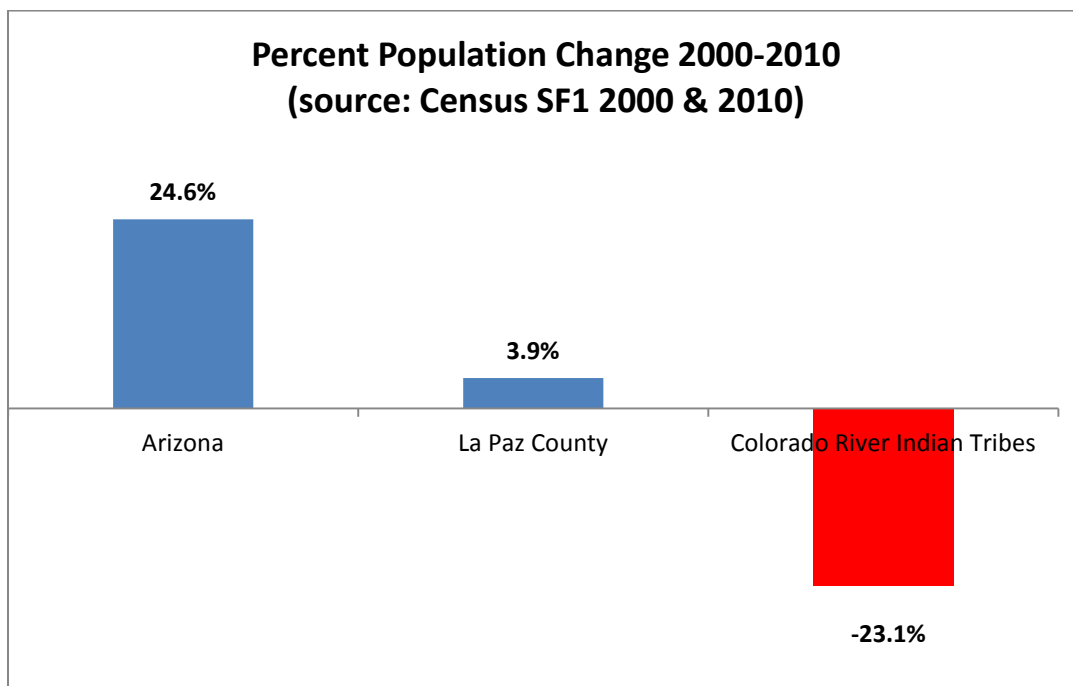

The population of the Colorado River Indian Tribes saw a sharp decrease in population (-23.1%) in 2010 when compared to 2000. This decrease in tribal members, however, may not truly reflect the actual change in the tribe between the census periods. This decrease in tribal members, however, may not truly reflect the actual change in the tribal populations between the census periods. The SF1 census is considered the official count, and accounts for only the population within the exterior boundaries of the tribal lands or nation. Both the State (24.6%) and the County (10.2%) grew between the last census in 2000 and 2010. The La Paz County population grew slower than the State between the 2000 and 2010 Census.

Table 1. Total Population & Trends

| Total Population and Trends | Arizona | La Paz County | Colorado River Indian Tribes |
|--------------------------------|-----------|---------------|------------------------------|
| Total Population 2000 | 5,130,632 | 19,715 | 9,201 |
| Total Population 2010 | 6,392,017 | 20,489 | 7,077 |
| Change in Population 2000-2010 | 24.6% | 3.9% | -23.1% |

Source: Census 2000, 2010 SF1

Figure 1. Percent Population Change 2000 to 2010 Arizona, La Paz County & the Colorado River Indian Tribes

Gender

There are more males (51.1%) than females (48.9%) within the Colorado River Indian Tribes. The gender ratios in the Colorado River Indian Tribes are higher for males in both the State (49.7%) and the County (51.1%). Females (48.9%) comprise a slightly smaller proportion of the population among the Colorado River Indian Tribes tribal members than either the State (50.3%) or the County (48.5%).

Table 2. Gender Ratios

| | Arizona | La Paz County | Colorado River Indian Tribes |
|---------|-----------|---------------|------------------------------|
| Males | 3,175,823 | 10,550 | 3,613 |
| Females | 3,216,194 | 9,939 | 3,464 |

Source: Census 2000, 2010 SF1

Age

The Colorado River Indian Tribes is dominated by those under 18 years of age. The under-18 year population accounts for 29.9 percent of all tribal members, representing a larger proportion for that age group compared to the State (25.5%) and a much larger proportion than La Paz County (18.0%). The fact that almost one-third of the tribe is younger than 18 years of age carries with it important policy implications. The large portion of younger tribal members influences the provision of health and educational services as well as poverty and workforce issues as well.

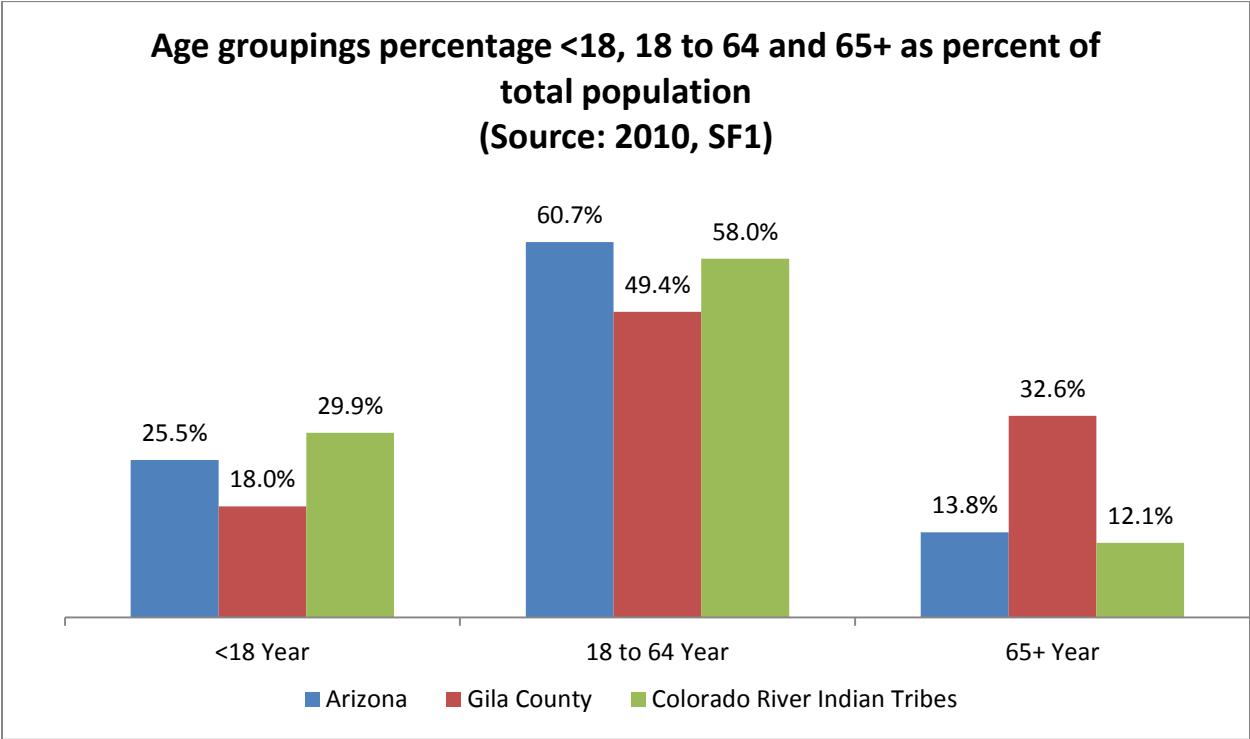

On the other hand, the tribe has fewer members who are 65 years or older as a proportion of the total population. This age group, those who have retired and are out of the workforce account for only 12.1 percent of tribal members when compared to 13.8 percent for the state and 32.6 percent for the county. The Colorado River Indian Tribes have a similar age profile vis-à-vis other Arizona tribes, with a greater percentage of tribal members under age eighteen. Finally, those age 18 to 64 years account for 58.0 percent of the tribal members, which is lower than the State (60.7%) but the same as the County (49.4%). The large number of tribal young persons will have an effect on the development of the tribal workforce in the future. See Table 3, and Figure 1.

Table 3. Age Groups by 5 Year Cohorts

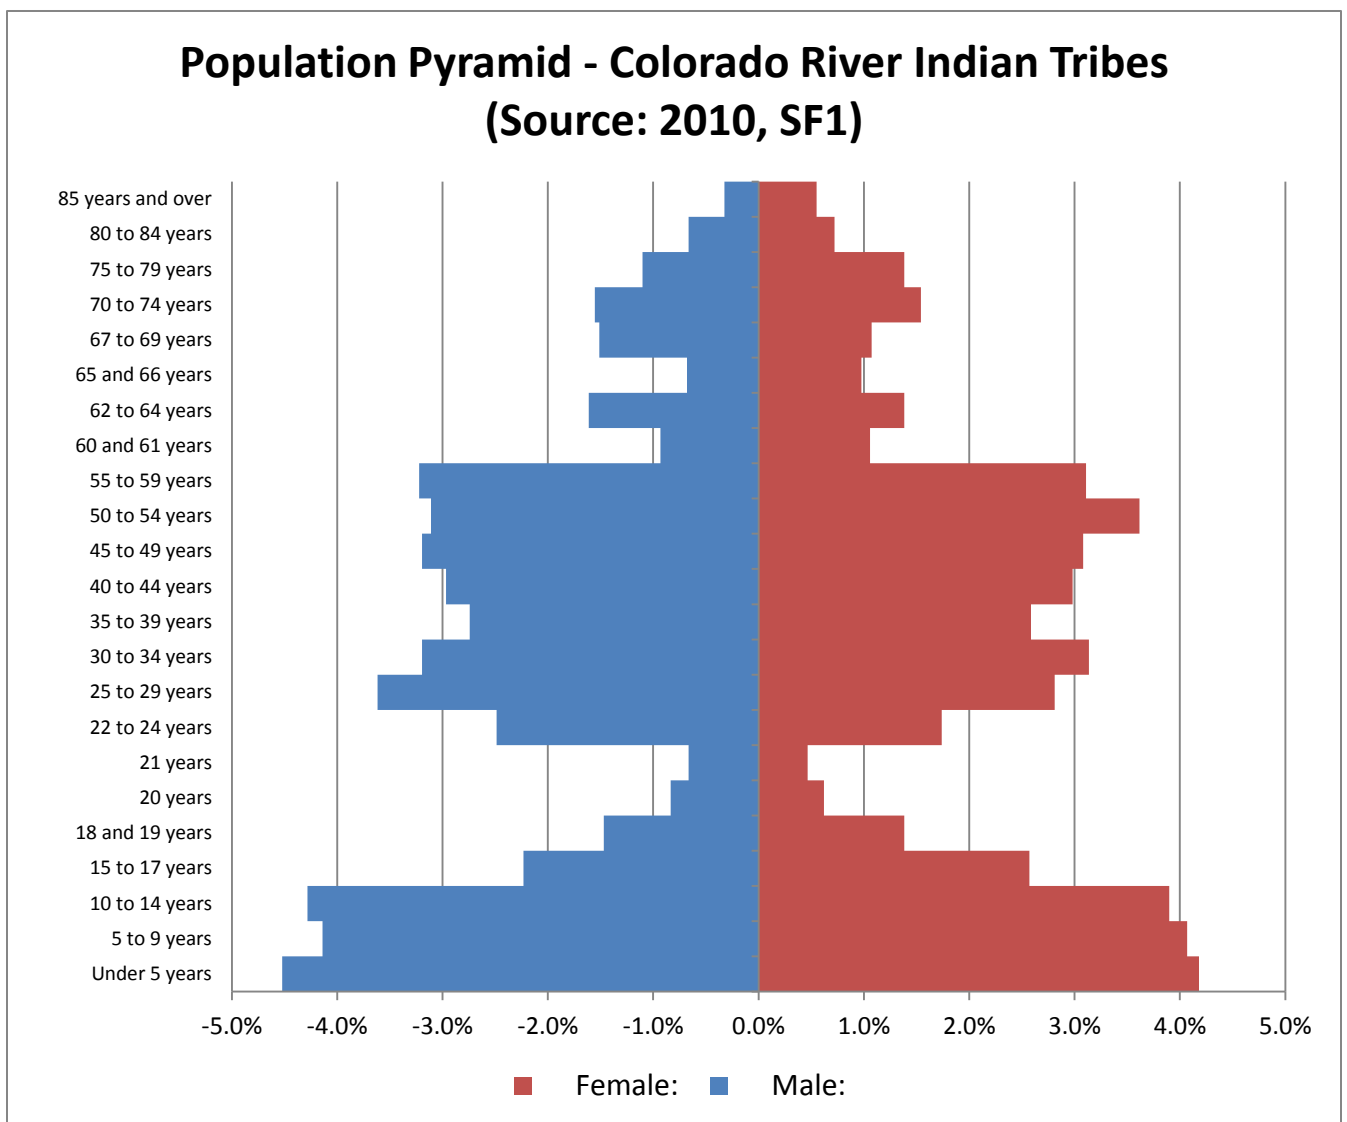

Figure 2. Age Cohorts for Arizona, La Paz County & the Colorado River Indian Tribes 2010

A population pyramid, also called an age structure diagram, is a graphical illustration that shows the distribution of various age groups in a population (typically that of a country or region of the world), which forms the shape of a pyramid when the population is growing.

The population pyramid below (Figure 3) illustrates the difference between males and females for the 5 year age cohorts. The under-18 age cohorts are symmetrical indicating that there are an even number of males and females. At the top of the age pyramid there are more females than males. This is also a demographic reality as women tend to live longer than men. The age pyramid provides an illustrated snapshot of the age structure of the tribal members at the time of the 2010 census.

Figure 3. Population Pyramid - the Colorado River Indian Tribes 2010

Population Under 18 Years

Children those under 18 years of age account for 29.9 percent of all tribal members. There are 3,613 males and 3,464 female tribal members, of those 29.7 percent of all males are under age 18 and 30.1 percent of all females are under age 18. There are more males under age 5 years (35.6%) than females (34.3%), while the sex ratios are similar for those between 5 and 10 and 11 to 17 years of age. See Table 4.

Table 4. Single year age by gender for those under 18 years of age

| Total Under 18 Years of age | 1,074 | 100% | 1,042 | 100% |

Source: Census 2010 SF1

Median Age

The median age (point that splits the population where 50% are above and 50% are below) for the Colorado River Indian Tribes tribal members is 33 years, with males and females aged 32 and 34 years respectively. The median age of tribal members is far lower than both the State (36 years) and the County 54 years. This statistic serves once more to emphasize the younger age profile of the Colorado River Indian Tribes. See Figure 4.

Figure 4. Median Age in Years 2010

Race

Not surprisingly, the majority of the Colorado River Indian Tribes tribal members identify themselves as American Indian or Alaska Native alone (34%), while the remaining 66 percent are split between white alone (35%), some other race alone (23%) and multi race persons (6%). This stands in strong contrast to the State which is 73 percent white alone, and the County which is 70 percent white alone. See Table 6.

Table 6. Race

| Race: | Arizona | | La Paz County | | Colorado River Indian Tribes | |
|---|------------------|-----|------------------|-----|------------------------------|-----|
| | Total Population | % | Total Population | % | Total Population | % |
| White alone | 4,667,121 | 73% | 14,306 | 70% | 2,499 | 35% |
| Black or African American alone | 259,008 | 4% | 129 | 1% | 52 | 1% |
| American Indian and Alaska Native alone | 296,529 | 5% | 2,628 | 13% | 2,414 | 34% |
| Asian alone | 176,695 | 3% | 107 | 1% | 41 | 1% |
| Native Hawaiian and Other Pacific islander alone | 12,648 | 0% | 7 | 0% | 4 | 0% |
| Some Other Race alone | 761,716 | 12% | 2,551 | 12% | 1,617 | 23% |
| Multi Race - Persons reporting more than one race | 218,300 | 3% | 761 | 4% | 450 | 6% |

Source: Census 2010 SF1

Ethnicity

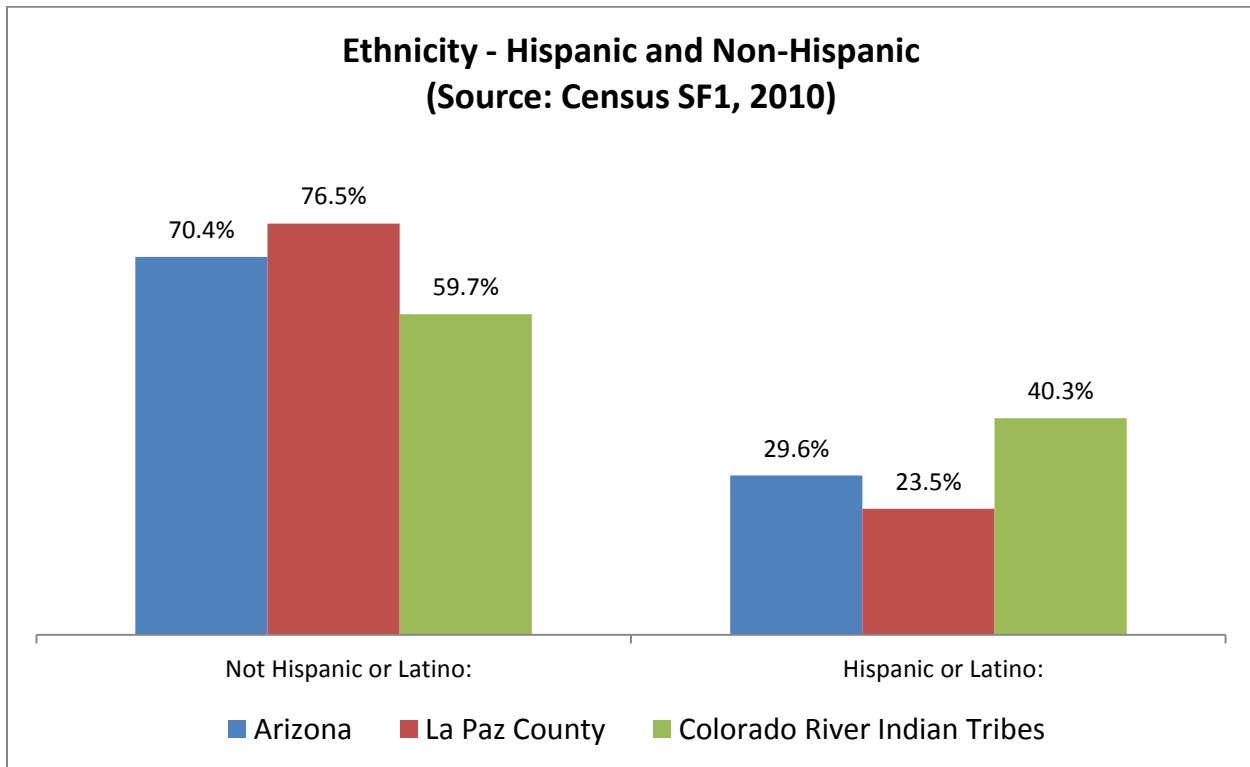

In terms of ethnicity, almost two-fifths (40.3%) of the Colorado River Indian Tribes tribal members, self-identify themselves as Hispanic or Latino. This is higher than the State (29.6%) and the surrounding County where 23.5% percent of individuals self-identify as Hispanic or Latino. See Table 7, and Figure 5.

Table 7. Ethnicity

| HISPANIC OR LATINO ORIGIN: | Arizona | | La Paz County | | Colorado River Indian Tribes | |
|----------------------------|-----------|-------|---------------|-------|------------------------------|-------|
| Total Population | 6,392,017 | % | 20,489 | | 7,077 | |

| Hispanic or Latino: | 1,895,149 | 29.6% | 4,806 | 23.5% | 2,853 | 40.3% |

Source: Census 2010 SF1

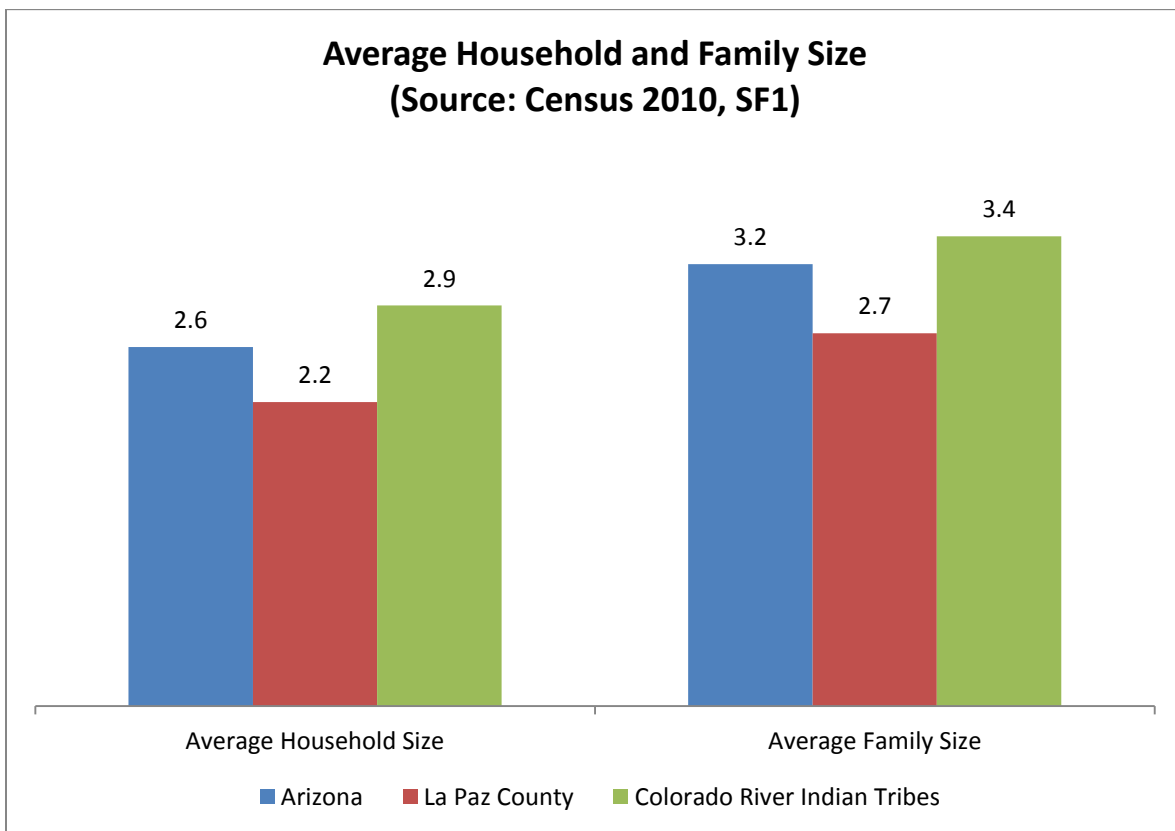

Figure 5. Ethnicity

Households

In 2010, there were 2,336 households on the Colorado River Indian Tribes, with an average household size of 2.9 persons and an average family size of 3.4 persons as well. The average household size of 2.9 persons is larger than the State average (2.6 persons) and larger than the County average (2.2 persons). The average family size for tribal members (3.4 persons) is also larger than the State and the County, where the average is 3.2 and 2.7 persons respectively. See Figure 6.

Figure 6. Average Household and Family Size

The next portion of this analysis concerns households and their structure. The Census, defines as “household” as a person or group of people who occupy a housing unit. The “householder” is a person in whose name the housing unit is owned, being bought, or rented. A “family household” consists of a householder and one or more people living together in the same household who are related to the householder by birth, marriage, or adoption — it may also include people unrelated to the householder. If the householder is married and living with his/her spouse, then the household is designated a “married-couple household.” The remaining types of family households not maintained by a married couple are designated by the sex of the householder. A “nonfamily household” consists of a person living alone or a householder who shares the home with nonrelatives only; for example, with roommates or an unmarried partner.

Family households (70.5%) predominate on the Colorado River Indian Tribes, traditional married couple families are however in the minority (42.0%) lower than the State (48.1%) or the County (47.2%). Households headed by a female head of household (single moms) account for one-fifth (19.9%) of all households. Almost two-thirds (61.9%) of all households are either married couple families (42.0%) or households headed by single mothers (19.9%). Other household structures include non-family households (29.5%), the majority of whom are unmarried partner households (10.5%). See Table 8 and Figure 7.

Source: Census 2010 SF1

Unmarried partner households (10.5%) occur at a higher rate in the Colorado River Indian Tribes than at the State (7.8%) or the County (8.0%). Householders with a member over age 65 account for almost half (41.1%) of all households, occurring at a higher rate than the County (19.3%) and the State (26.4%). Finally, tribal households are more likely to be headed by a single mother with their own children under age 18 (10.6%) a higher rate than the State (7.1%) and twice the rate of the County (4.6%).

Figure 7. Household Relationships

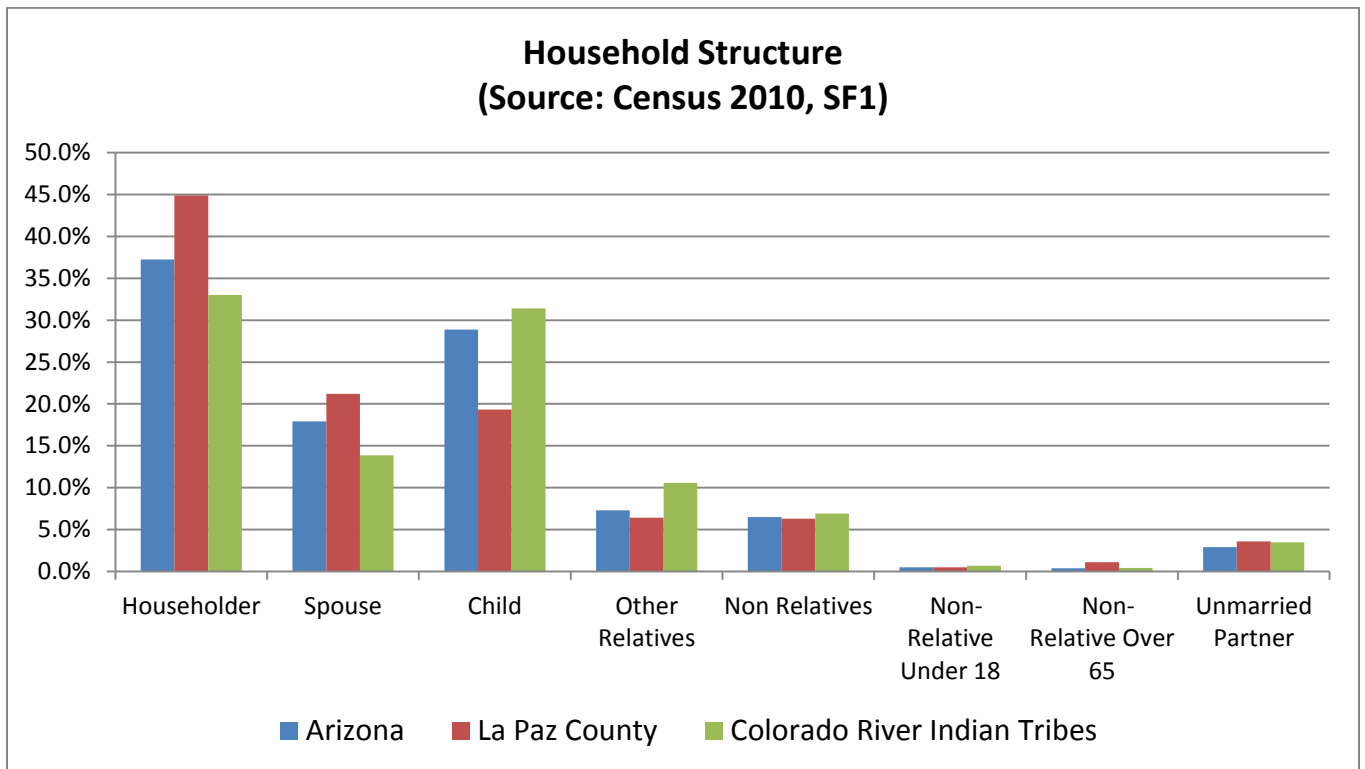

In terms of household characteristics 33.0 percent of all households are headed by a householder, lower than the State (37.2%) or the County (44.9%). Spouse headed households comprise a minority of Colorado River Indian Tribes tribal households (13.9%) far less than the State (17.9%) or the County (21.2%). Children comprise one-third of all households (31.4%), higher than the State (28.9%) and almost twice the County (31.4%). See Table 9 and Figure 8.

Figure 8. Household Structure

Family households dominate among Colorado River Indian Tribes tribal members (71%), compared to 66 percent for the State and the County (61%). Non-family households account for one-fourth (29%) of tribal member households more than the State (34%) or County (39%). Husband and wife families account for almost two-thirds (60%) of households, whereas residents of the State (73%) and the County (78%) are more likely to live in husband and wife households. Households on the Colorado River Indian Tribes are two times more likely to be headed by a female householder (28%) with no husband present. Households headed by single mothers are far less prevalent at the State (12%) or County (9%). Households on the Colorado River Indian Tribes are more likely (41%) to have children under the age of 18 living in the household, than the State (34%) and twice the County rate (19%). See Table 10, and Figure 9.

Children Under 18 Years Age Living with Grandparent

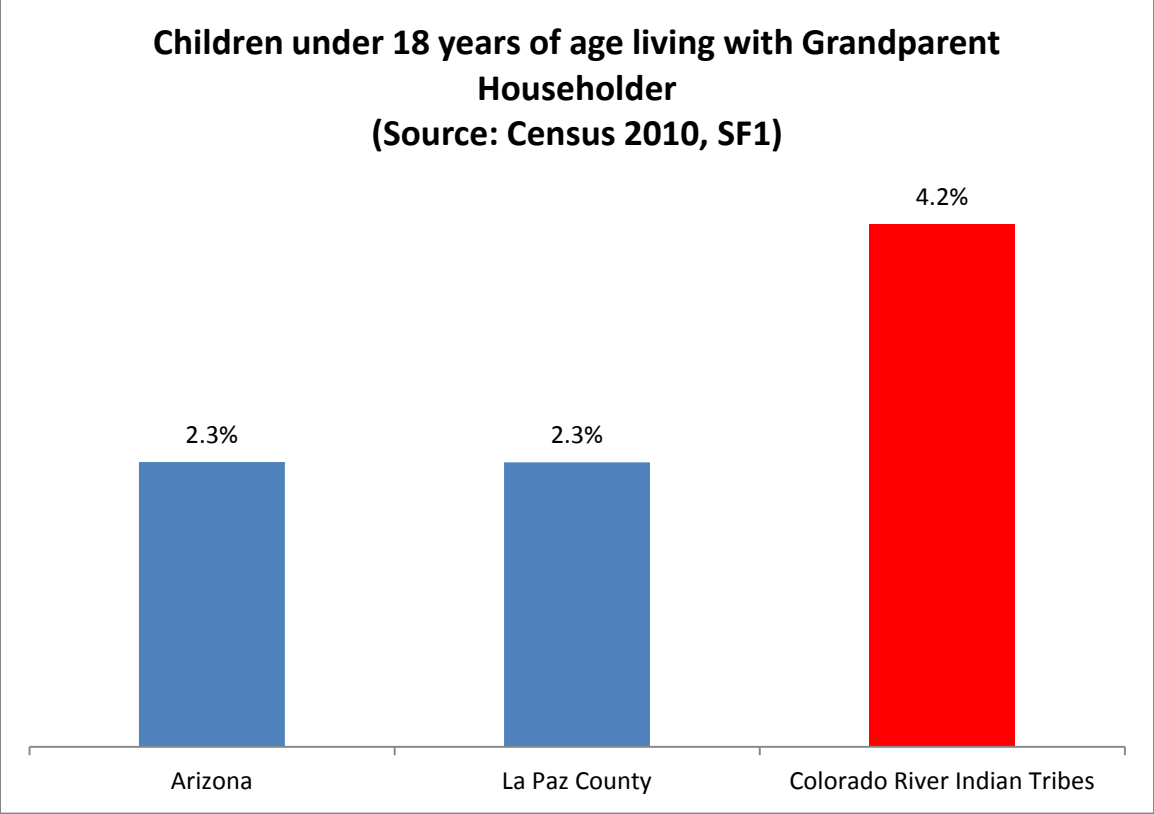

Children under age 18 are two times as likely to live with grandparents on the Colorado River Indian Tribes (4.2%) than they are at the State (2.3%) or in the County (2.3%). There are few differences between the proportions of children by age living with grandparents, when comparing the Colorado River Indian Tribes, the State or the County. See Table 11 and Figure 10.

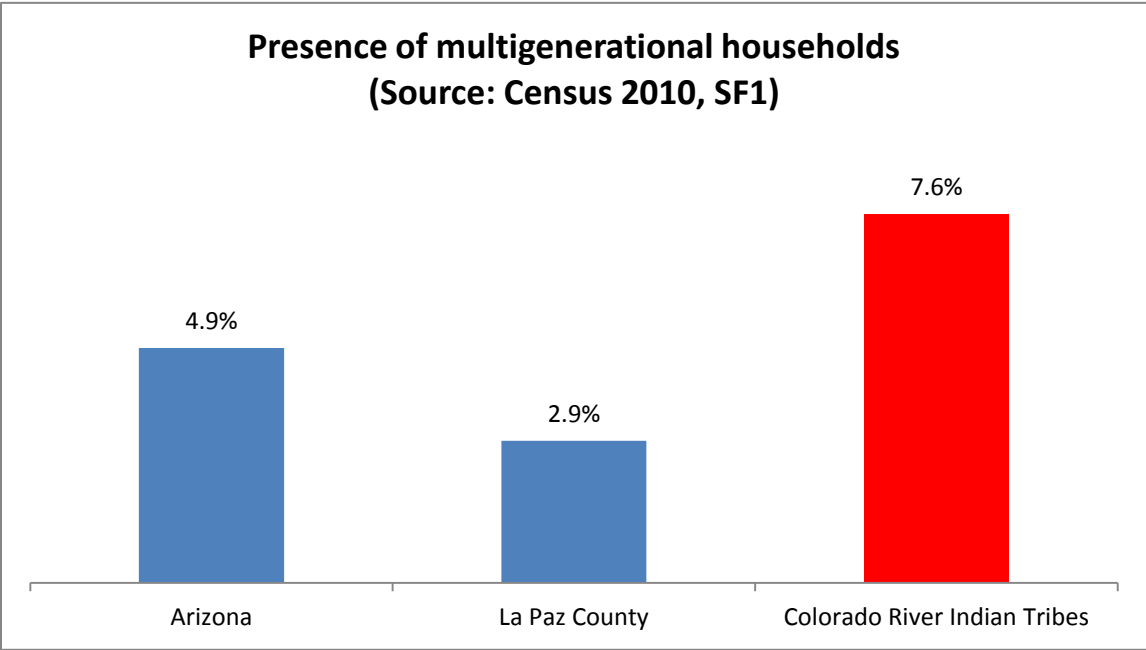

Figure 10. Percentage of children under 18 living with a grandparent householder

Presence of Multigenerational Households

Households on the Colorado River Indian Tribes are twice as likely to be multigenerational (7.6%), than the State (4.9%) and the County (2.9%). The Census defines multigenerational families as family households consisting of more than two generations, such as a householder living with his/her children and grandchildren. Multigenerational family households may be more likely to reside in areas where new immigrants live with their relatives, in areas where housing shortages or high costs force families to double up their living arrangements, or in areas that have relatively high rates of out-of-wedlock childbearing. See Figure 11.

Figure 11. Presence of multigenerational households

Household Income

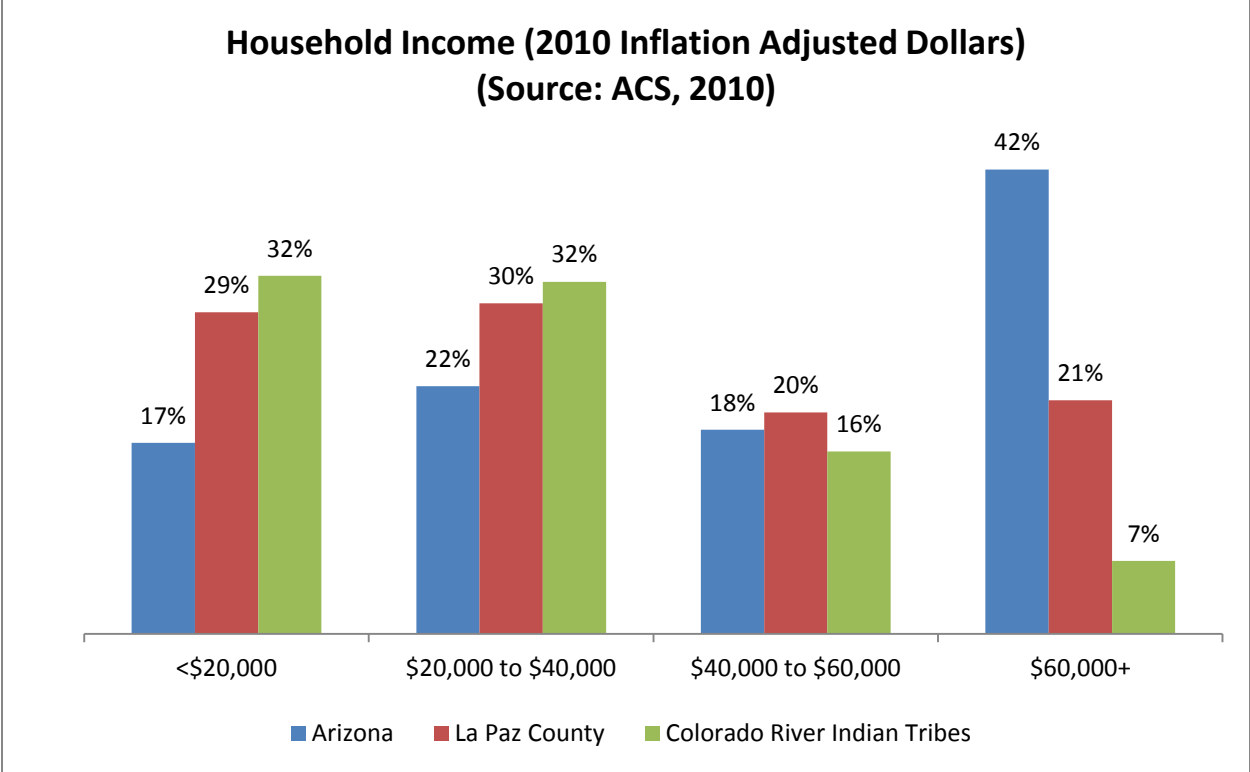

The median household income for the Colorado River Indian Tribes is \$27,925, less than the County (\$32,147) and less than the State (\$51,310). Tribal members are more likely to have lower household incomes than both the State and the County. One-third (32%) of all households on the Colorado River Indian Tribes have incomes of less than \$20,000 when compared to the State (17%), and the County (29%). Tribal members are more likely to have household incomes between \$20,000 and \$40,000 (32%) at the same proportion as the County (30%) and higher than the State (22%). Almost ten percent (7%) of tribal members have incomes in excess of \$60,000. See Table 12, and Figure 12.

Supplemental Income

Households on the Colorado River Indian Tribes are two times as likely (21%) to receive Food Stamps/SNAP than are residents of the State (10%) and the County (13%). More tribal members (3%) receive public assistance income than do residents of the County (2%) and the State (2%). See Table 13 and Figure 13.

Other Income

Per capita Income on the Colorado River Indian Tribes (\$16,000) is lower than the per capita income for the County (\$21,165) and the State (\$25,680). Correspondingly, the median earnings for workers (\$20,366) is lower than that of the County (\$21,633) and the State (\$29,573). See Table 14

Table 14. Other Income Measures (In 2010 Inflation-Adjusted Dollars)

| | Arizona | La Paz County | Colorado River Indian Tribes |
|--|-----------|---------------|------------------------------|
| Per capita income | \$25,680 | \$21,165 | \$16,000 |

Poverty

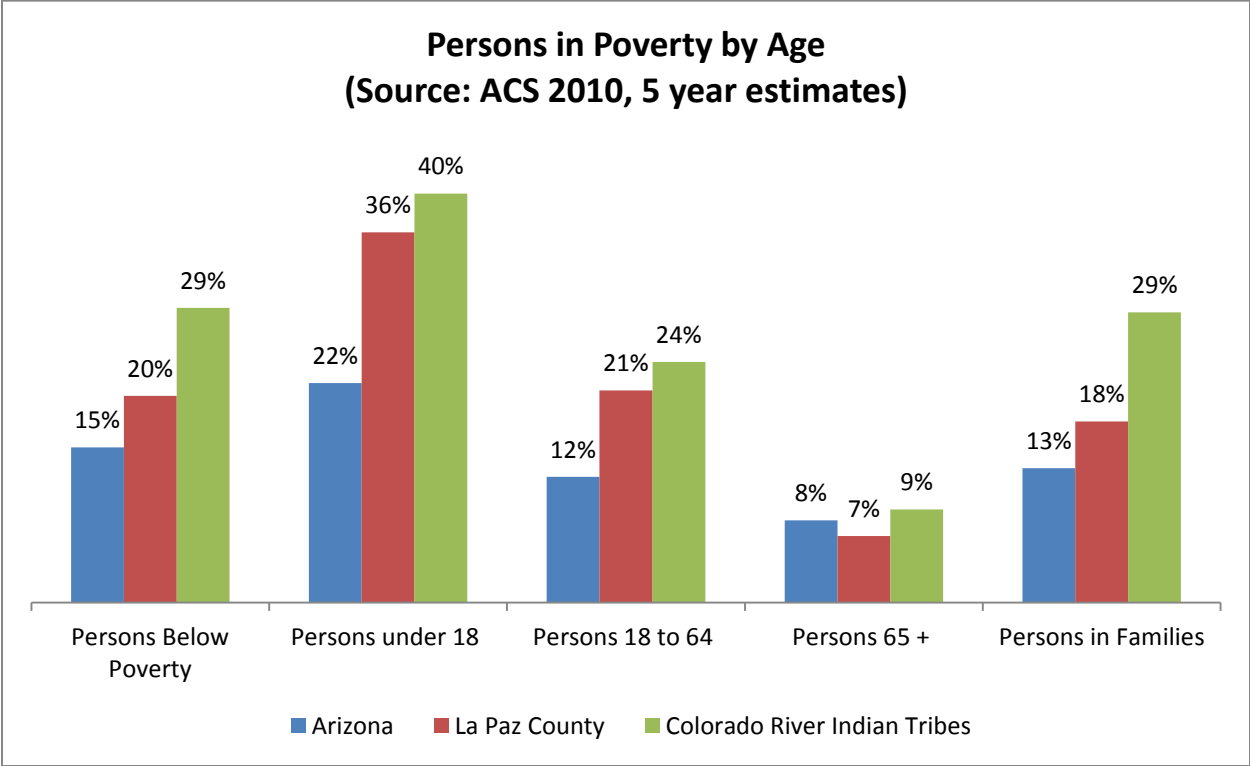

Poverty rates on the Colorado River Indian Tribes Reservation (29%) are higher than the State (15%) and County (20%) rates. Two-fifths (40%) of all children under 18 years of age are considered to be living in poverty, while one-fourth (24%) of tribal members between 18 and 64 also live in poverty. Almost one-third (29%) of persons living in families on the Colorado River Indian Tribes live in poverty, a higher rate than families in poverty at the state level (13%) or the County (18%). One-tenth of all persons over 65 years of age (9%) live in poverty, slightly higher than State (8%) and County (7%) poverty rates for this age group. See Table 15 and Figure 14.

Figure 14. Persons in poverty by age

Children in Poverty

The rates of children under 18 years of age living in poverty are twice as high for the tribe (29%) as the State (15%) or the County (20%). The highest poverty rates for tribal members are recorded for those children between 6 and 17 years of age, where 25 percent of these school age children live below the poverty level. See Table 16.

Households in Poverty

The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. If a family's income is less than a family's threshold, then that family and every individual in it, is considered poor. Further the ratio of income to poverty can be used to measure the degree or depth of poverty. The ratio of income to poverty compares a person's income with their poverty threshold, and expresses the comparison as a fraction. For example, a poverty ratio of 1.0 (income at 100% of poverty level) means a person is living right at the poverty line; a ratio of 0.5 (income at 50% of poverty level) would mean that a person is living in a household making only half the income designated as the poverty threshold. The Census Bureau describes those with family incomes below one half of their poverty threshold as being "severely poor." People with incomes at or above their threshold but below 125 percent of their threshold are classified as "near poor."

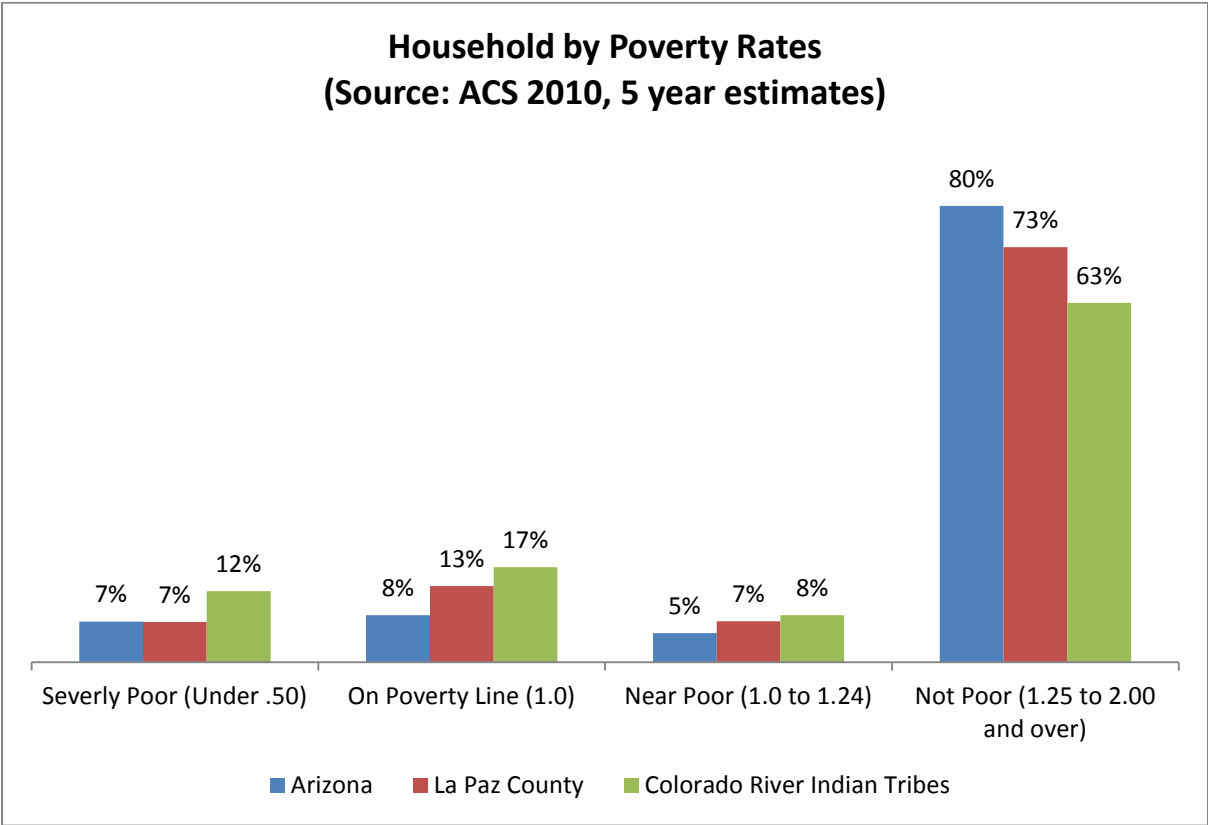

Less than one-third (29%) on the Colorado River Indian Tribes tribal members are classified as "severely poor," with poverty ratios that ranges from below 0.5 to .99. These rates are twice those of the State (15%) or the County (20%). A further 8 percent of tribal members are classified as "near poor" with poverty ratios between 1.00 and 1.24. The data indicates that more than one-third (37%) of households are below the poverty line, while the remaining 63 percent are located above the poverty line. See Table 17 and Figure 15.

Figure 15. Households by poverty ratios

Households Receiving Supplemental Nutrition Assistance Program (SNAP)

One-fifth (20.4%) of all households on the Colorado River Indian Tribes Reservation receive assistance from the Supplemental Nutrition Assistance Program (SNAP). This rate is at least two times higher than the State (9.1%) and higher than the County (12.9%). A small percentage (4.2%), of all households receiving SNAP assistance contains at least one person living in the household over 60 years of. This rate is higher than the County (3.9%), and three times the State (2.0%) rate. See Table 18.

Table 18. Households Receiving SNAP Assistance

| | Arizona | La Paz County | Colorado River Indian Tribes |
|---|-----------|---------------|------------------------------|
| Total Households | 2,326,468 | 10,158 | 3,446 |
| Household received Food Stamps/SNAP in the past 12 months: | 212,791 | 1,315 | 704 |
| At least one person in household 60 years or over | 46,099 | 399 | 144 |
| No people in household 60 years or over | 166,692 | 916 | 560 |
| Household did not receive Food Stamps/SNAP in the past 12 months: | 2,113,677 | 8,843 | 2,742 |
| At least one person in household 60 years or over | 736,174 | 5,359 | 1,098 |
| No people in household 60 years or over | 1,377,503 | 3,484 | 1,644 |

Fertility

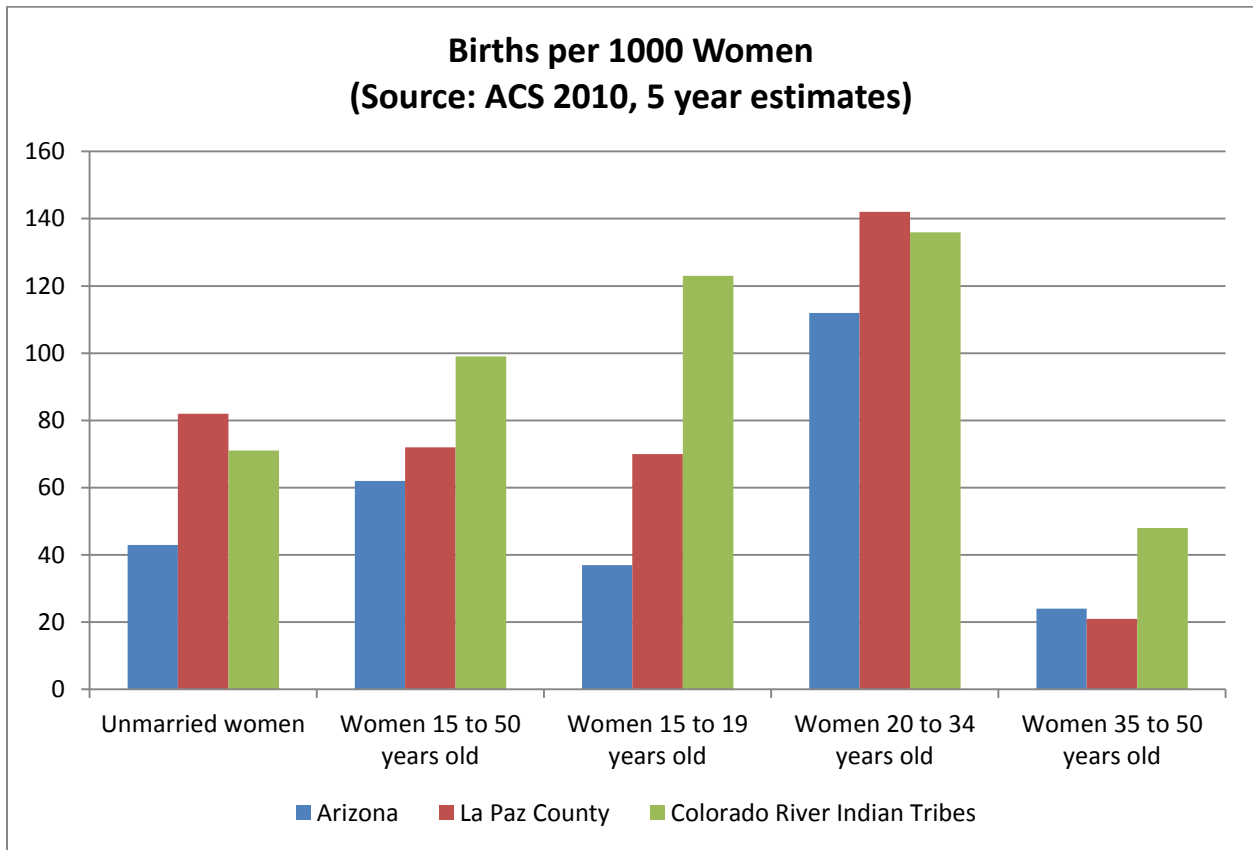

The birth rate for women between the ages of 15 and 50 years for the Colorado River Indian Tribes is 9.9 percent, slightly higher than the County (7.2%) and the State (6.2%). The birth rate for unmarried mothers on the Colorado River Indian Tribes Reservation (7.1%) is twice as high as the State (4.3%) and lower than the County (8.2%) rate. See Table 19 and Figure 16.

**APPENDIX C:
THE COLORADO RIVER INDIAN TRIBES
AMERICAN COMMUNITY SURVEY 2010, 5-YEAR ESTIMATES
MARGIN OF ERROR ESTIMATES**

ACS Margin of Error Estimates

The ACS estimates are based on data from a sample of housing units and people in the population, not the full populations. For this reason, ACS estimates have a degree of uncertainty associated with them, called sampling error. In general, the larger the sample, the smaller the level of sampling error. The ACS calculates standard errors for each estimate produced and publishes the 90 percent confidence level margins of error (the Census Bureau standard). You can be 90 percent confident that the interval within the margin of error from the estimate includes the true value. Users can add and subtract the margin of error value from the estimate to find the top and bottom of the range within which the ACS is 90 percent confident in their estimate lies.

Understanding margin of error

A term you will often come across in survey research is "within the margin of error." Most people hear the term frequently during election season when results from polls are reported. Many surveys and polls collect data from a representative sample of a population to make determinations about a larger population. Results would be somewhat different each time the survey is administered to a different representative sample. The margin of error accounts for these differences by calculating an upper and lower boundary the true result would likely fall between if every member of population was surveyed.

For example, in the case of the Colorado River Indian Tribes the ACS has established that there are 4,267 households represented on the CRIT Reservation. The survey also indicates that there are 2,801 family households (families) with a margin of error of plus or minus (\pm) 4.2 percent and 65.6 percent of the respondents responding indicated that they were in fact family households. The margin of error tells us that if the same survey were administered to the Hualapai Tribal members again, it is highly probable that the percent of "family household" responses would be between 61.4 percent and 69.8 percent, or 65.6 percent \pm 4.2 percent.

Table 31: Colorado River Indian Tribes margin of error estimates

| Subject | Colorado River Indian Reservation, AZ--CA | | | |

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
